Accounting Officer's Responsibilities and Approval

The accounting officer is required by the MFMA Act 56 of 2003, to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and were given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with South African Standards of GRAP including any interpretations, guidelines and directives issued by the Accounting Standards Board. The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgement and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and places considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to end 30 June 2018 and, in the light of this review and the current financial position, he is satisfied that the municipality has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for auditing and reporting on the municipality's annual financial statements. The annual financial statements have been examined by the municipality's external auditors and their report is presented separately.

The annual financial statements set out on pages 6 to 108, which have been prepared on the going concern basis, were approved and signed by the municipal manager on 31 August 2017 .

The accounting officer further certifies that the salaries, allowances and benefits of councillors and payments made to councillors for loss of office, if any, as disclosed in note 35 and 58 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

Accounting Officer

Dr. Pierre Voges

31 August 2017

Vredenburg

Refer to note 61 for an explanation of material differences in the statement of comparison of budget and actual amounts.

Accounting Policies

1. Summary of significant accounting policies

The municipality's principal accounting policies, which are in all material aspects consistent with those applied in the previous year, are set out below. The details of any changes in accounting policies are explained in the note thereto. The historical cost convention has been used, except where indicated otherwise. Management has used assessments and estimates in preparing the annual financial statements which are based on the best information available at the time of preparation.

1.1 Basis of presentation

The annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP), including any interpretations, guidelines and directives, issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

Presentation currency

These financial statements are presented in South African Rand, which is the functional currency of the municipality.

Going concern assumption

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

Comparative information

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed.

Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

Level of rounding

The amounts presented in the financial statements have been rounded-off to the nearest Rand.

1.2 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Impairment of trade receivables

The calculation of the impairment of trade receivables is based on a payment percentage assessment of the individual debtors of the municipality. If an individual debtor has a payment percentage of more than 90%, impairment is not considered. In instances where the payment percentage is less than 90%, the individual debtor is impaired based on the actual non-payment percentage of the outstanding debt.

Impairment testing

The recoverable amounts of cash and non-cash generating assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

Fair value estimation

The carrying value less impairment provision of trade receivables are assumed to approximate their fair value.

Accounting Policies

1.2 Significant judgements and sources of estimation uncertainty (continued)

Provisions

Management's judgement is required when recognising and measuring provisions, contingent liabilities and contingent assets.

Useful lives of infrastructure and other assets

The municipality's management annually determines the estimated useful lives and related depreciation charges for the infrastructure and other assets. This estimate is based on industry norms or technical advice. Management will amend the depreciation charge where there is a change in the estimated useful lives.

Post-retirement benefits

The present value of the post-retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will have an impact on the carrying amount of post-retirement obligations.

Other key assumptions for post-retirement benefits are based on current market conditions. Additional information is disclosed in Note 19 - Employee benefit obligation.

Effective interest rate

The municipality used the most relevant contractual risk rate applicable where relevant to each category of assets and liabilities to discount future cash flows. Where none exists the prime interest rate is used to discount future cash flows.

Allowance for debtors impairment

On receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivables carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

1.3 Standards, amendments to standards and interpretations issued but not yet effective

In the current year the municipality has adopted all new and revised standards and interpretations issued by the ASB that are relevant to its operations and are effective. The following GRAP standards have been issued, but are not yet effective during the current reporting period and the municipality did not early adopt these GRAP standards.

Reference	Topic	Effective date
GRAP 18	Segment reporting (Not applicable to the municipality)	1 April 2015
GRAP 20	Related party disclosures	Unknown
GRAP 32	Service concession arrangements (Grantor)	Unknown
GRAP 108	Statutory receivables	Unknown
GRAP 109	Accounting by principals and agents	Unknown
iGRAP17	Service concession arrangements where a grantor controls a significant residual interest in an asset	Unknown

Management has considered all of the above-mentioned GRAP standards issued but not yet effective and anticipates that the adoption of these standards will not have a significant impact on the financial position, financial performance or cash flows of the municipality.

1.4 Housing Development Fund

The Housing Development Fund was established in terms of the Housing Act, Act 107 of 1997.

Sections 15(5) and 16 of the Housing Act, which came into effect on 1 April 1998, required the Municipality to maintain a separate housing operating account. This legislated separate operating account is known as the Housing Development Fund and is fully cash-backed.

In terms of section 14(4)(d)(ii)(aa) of the Housing Act, read with, inter alia, section 16(2), it is required that the net proceeds of any letting, sale or alienation of property, previously financed from government housing funds, to be paid into a separate operating account, and be utilised by the municipality for housing development in accordance with the National Housing Policy.

Accounting Policies

1.5 Budget information

The approved budget covers the fiscal period from 2016/07/01 to 2017/06/30.

The annual budget figures have been presented in accordance with the GRAP reporting framework. Separate statements of comparison of budget and actual amounts, which forms part of the annual financial statements, has been prepared.

The comparison of budget and actual amounts is presented on the same accounting basis, same classification basis and for the same municipality and period as for the approved budget. The budget of the municipality is taken through a stakeholder consultative process and upon approval the approved budget it is made publicly available.

A difference of 10% or more between budgeted and actual amounts is regarded as material.

1.6 Investments

Investments are short-term deposits invested with various financial institutions for a period longer than three months, but not more than twelve months in accordance with the cash management and investment policies of the municipality.

Short-term deposits are not classified as part of cash and cash equivalents as these investments are not readily convertible to known amounts of cash. The short-term investments do not have a short maturity of three months or less from the date of acquisition and do not meet the definition of cash and cash equivalents in accordance with GRAP 2.

Recognition

The municipality recognises investments as a current asset when the funds have been transferred to the financial institution.

Measurement

The investments are initially measured at fair value plus the transaction costs that are directly attributable to their acquisition. The fair value is the total amount initially invested at the banking institution.

The investments are subsequently measured at amortised cost using the effective interest rate method. The gains on the investments are recognised in surplus or deficit through the amortisation process.

Derecognition

The municipality derecognises investments on maturity of the investments when the contractual rights to the cash flows from the investments are settled by the financial institutions.

1.7 Changes in accounting policy

The annual financial statements have been prepared in accordance with South African Statements of Generally Recognised Accounting Practice on a basis consistent with the prior year, except for the withdrawal of the following new or revised GRAP standards as per Directive 5 as issued by the Accounting Standards Board:

Reference	Topic	Effective date
GRAP 1	Presentation of Financial Statements: revised version	1 April 2016
GRAP 16	Investment Property: revised version	1 April 2016
GRAP 17	Property Plant and Equipment: revised version	1 April 2016
GRAP 31	Intangible Assets: revised version	1 April 2016
GRAP 103	Heritage Assets: revised version	1 April 2016

Accounting Policies

1.7 Changes in accounting policy (continued)

Nature of impending changes in accounting policy

Revised GRAP 1 effective from 1 April 2016

Paragraph 102(c) requires the nature and amount of expenditure incurred on assets to repair and maintain them be separately disclosed when the expenditure is material.

Revised GRAP 16 effective from 1 April 2016

Paragraphs 7 to 25 have been revised to provide more clarity on the condition under which assets should be classified as investment property;

Paragraph 45 has been amended to indicate that the valuer or other expert may be employed by the entity and need not be independent;

Paragraph 91(c) has been revised to require the municipality to disclose, when classification is difficult, the criteria it uses to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of operations, including the nature or type of properties classified as held for strategic purpose;

Paragraph 91(e) has been revised to require the municipality to disclose separately repair and maintenance from direct operating expenses arising from investment property; and

Paragraph 92 has been amended to require the municipality to disclose the following in the notes to the financial statements in relation to investment property which is in the process of being constructed or developed:

(a) The cumulative expenditure recognised in the carrying value of investment property.

(b) The carrying value of investment property that is taking a significantly longer period of time to complete than expected, including reasons for any delays.

(c) The carrying value of investment property where construction or development has been halted, either during the current or previous reporting period(s). The entity shall also disclose reasons for halting the construction or development of the asset and indicate whether any impairment losses have been recognised in relation to these assets.

Revised GRAP 17 effective from 1 April 2016

Paragraphs 56 - 70 amended to include more guidance on the assessment of assets for changes in the expectations about residual value and useful life.

Paragraph 87 has been amended to require the municipality to disclose the following in the notes to the financial statements in relation to property, plant and equipment which is in the process of being constructed or developed:

(a) The cumulative expenditure recognised in the carrying value of property, plant and equipment. These expenditures shall be disclosed in aggregate per class of asset.

(b) The carrying value of property, plant and equipment that is taking a significantly longer period of time to complete than expected, including reasons for any delays.

(c) The carrying value of property, plant and equipment where construction or development has been halted, either during the current or previous reporting period(s). The municipality shall also disclose reasons for halting the construction or development of the asset and indicate whether any impairment losses have been recognised in relation to these assets.

Paragraph 88 requires the municipality to separately disclose expenditure incurred to repair and maintain property, plant and equipment in the notes to the financial statements.

Accounting Policies

1.7 Changes in accounting policy (continued)

The encouraged disclosures from paragraph 86 of the previous version have been deleted.

Revised GRAP 31 effective from 1 April 2016

Paragraph 87 has been amended to require the municipality to disclose the following in the notes to the financial statements in relation to intangible assets which are in the process of being developed:

(a) The cumulative expenditure recognised in the carrying value of such intangible assets. These expenditures shall be disclosed in aggregate per class of intangible asset, distinguishing between internally generated and other intangible assets.

(b) The carrying value of intangible assets that are taking a significantly longer period of time to complete than expected, including reasons for any delays.

(c) The carrying value of intangible assets where development has been halted either during the current or previous reporting period(s). The entity shall also disclose reasons for halting the development of the asset and indicate whether any impairment losses have been recognised in relation to these assets.

The encouraged disclosures from paragraph 128(a) of the previous version have been deleted.

Revised GRAP 103 effective from 1 April 2016

Paragraph 87 has been amended to require the municipality to disclose the following in the notes to the financial statements in relation to heritage assets which are in the process of being constructed or developed:

(a) The cumulative expenditure recognised in the carrying value of such heritage assets. These expenditures shall be disclosed in aggregate per class of heritage asset.

(b) An analysis of the carrying value of heritage assets that are taking a significantly longer period of time to complete than expected, including reasons for any delays.

(c) An analysis of the carrying value of heritage assets where construction or development has been halted. The municipality shall also disclose reasons for halting the construction or development of the asset and indicate whether any impairment losses have been recognised in relation to these assets.

Paragraph 88 requires the municipality to separately disclose expenditure incurred to repair and maintain heritage assets in the notes to the financial statements.

1.8 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one reporting period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

Accounting Policies

1.8 Property, plant and equipment (continued)

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand-by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and standby equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The municipality maintains and acquires assets to provide a social service to the community, with no intention of disposing of the assets for any economic gain.

The gain or loss arising from the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value, and is recognised in the statement of financial performance.

Depreciation rates

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. The depreciable amount is determined after taking into account an asset's residual value, where applicable. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated useful asset lives:

Accounting Policies

1.8 Property, plant and equipment (continued)

Asset type	Estimated useful lives (years)
Land	
• Municipal land	**Indefinite**
Building	
• Airport buildings	40
• Buildings - Other	15 - 70
• Electricity buildings	60
• Buildings - Security	3 -10
Other Assets	
• Bins	5 - 40
• Containers	10
• Emergency equipment	5 - 20
• Furniture and fittings	5 - 40
• Motor vehicles	3 - 40
• Office equipment	2 - 30
• Plans	5 - 20
• General plant	2 - 20
• Water craft	15
Infrastructure	
• Airports	51
• Cleansing	6 - 50
• Electricity	5 - 100
• Gas	20
• Landfill sites	0 - 10
• Pedestrian malls	20 - 50
• Roads	6 - 99
• Security measures	3 - 20
• Sewarage	5 - 99
• Towers	15
• Water	6 - 99
Community	
• Buildings	15 - 20
• Recreational facilities	15 - 50
Finance leased assets	
• Cell phones	2
• Telecommunication equipment	5
• Office machines	3

The residual value, and the useful life and depreciation method of each asset, if not insignificant, is reviewed annually with the effect of any changes in estimates accounted for on a prospective basis as a change in accounting estimate in the statement of financial performance.

Assets under construction are carried at cost. Depreciation of an asset commences when the asset is available for use. All assets under construction which have exceeded the initial planned completion date by two years are considered to be taking a significantly longer period of time to complete than expected.

Accounting Policies

1.8 Property, plant and equipment (continued)

Assets held under finance leases are depreciated over the useful lives on the same basis as owned assets or, where appropriate, the term of the relevant lease and are recognised in the statement of financial performance.

Costs incurred to repair and maintain property, plant and equipment comprises of goods and services and contracted services. These cost excludes labour cost.

1.9 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as provision for rehabilitation of landfill sites.

The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

All changes in the liability are added to, or deducted from, the cost of the related asset in the current period. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in the statement of financial performance. If the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of non-cash-generating assets.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability are recognised in surplus or deficit. The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

1.10 Heritage assets

Assets are resources controlled by a municipality as a result of past events and from which future economic benefits or service potential are expected to flow to the municipality.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

A heritage asset is defined as an asset that has a cultural, environmental, historical, natural, scientific, technological or artistic significance, and is held and preserved indefinitely for the benefit of present and future generations.

Heritage assets are stated at cost, less accumulated impairment losses. Where a heritage asset is acquired through a non-exchange transaction, its cost is deemed to be its fair value as at the date of acquisition.

The gain or loss arising from the disposal or retirement of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying value and is recognised in the statement of financial performance. Heritage assets are not depreciated, since their long economic life and high residual value means that any depreciation would be immaterial. Heritage assets are considered to have indefinite useful lives.

Heritage Assets under construction are carried at cost. All assets under construction which have exceeded the initial planned completion date by two years are considered to be taking a significantly longer period of time to complete than expected.

Cost incurred to repair and maintain heritage assets comprises of goods and services and contracted services. These costs excludes labour cost.

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Initial measurement

Heritage assets are measured at cost.

Accounting Policies

1.10 Heritage assets (continued)

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage assets on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such a difference is recognised in surplus or deficit when the heritage asset is derecognised.

1.11 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful lives.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Asset type	Estimated useful lives (years)
Computer software, other	1 - 15
Other intangible assets	Indefinite

1.11 Intangible assets (continued)

Intangible assets are derecognised:
- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

An intangible asset is defined as an identifiable non-monetary asset without physical substance, held for use in the production or supply of goods or services, for rental to others or for administrative purposes.

The municipality recognises computer development software costs as intangible assets if the costs are clearly associated with an identifiable and unique system controlled by the municipality, and have a probable benefit exceeding one year. Direct costs include software development employee costs and an appropriate portion of relevant overheads.

The residual value, amortisation method and useful life, if not insignificant, are reassessed annually, with the effect of any changes in estimate accounted for on a prospective basis.

All intangible assets under construction which have exceeded the initial planned completion date by two years are considered to be taking a significantly longer period of time to complete than expected.

Costs incurred to repair and maintain intangible assets comprises of goods and services and contracted services. These costs excludes labour cost.

1.12 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:
- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

The municipality recognises investment property using the fair value model. The fair value is adjusted at each reporting date by means of the appointment of an independent valuer that holds a professional valuation qualification. The adjustment is recognised in the statement of financial performance as a fair value adjustment.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

All investment property under construction which have exceeded the initial planned completion date by two years are considered to be taking a significantly longer period of time to complete than expected.

Where investment properties are acquired through non-exchange transactions, the cost is deemed to be the item's fair value on the date of acquisition.

Revenue earned from rental of investment property is disclosed as part of rental of facilities and equipment and are thus not disclosed separately, as they are not material. Expenses in respect of investment property are disclosed as other expenditure and not disclosed separately as they are not material.

Investment property was not tested for impairment as the impairment is taken into account with the determination of the fair value at reporting date.

Accounting Policies

1.12 Investment property (continued)

Investment property is derecognised when there is a disposal or no future economic benefits or service potential are to be derived from the property. All gains or losses, which result from the derecognition are recognised in the statement of financial performance.

Cost incurred to repair and maintain investment property comprises of goods and services and contracted services. These cost excludes labour cost.

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

1.13 Inventories

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, or for no or a nominal consideration, and then their costs are their fair value as at the date of acquisition.

Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Inventories are subsequently valued at the lower of cost (determined on the weighted-average basis) and net realisable value, unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost.

An assessment of net-realisable value is performed at each reporting period, when inventory is written down to their estimated net realisable values, and are recognised as an expense in the statement of financial performance.

When differences arise on the valuation of inventory, the amount of any reversal or any write-down of inventories is recognised as an adjustment in the statement of financial performance in the period in which it occurs.

The basis of determining the cost of water purchased but not yet sold at reporting date comprises all costs of the purchase, cost of conversion and other costs incurred in bringing the inventory to its present location and condition, net of trade discounts and rebates.

Housing inventory is low cost houses still in process of construction, or completed and not yet transferred. These houses are entirely funded by the National Department of Human Settlements, through the Western Cape Department of Human Settlements.

In terms of GRAP standards a municipality can either be regarded to be the “principal” or “agent” when executing the delivery of houses.

When the municipality is acting as the “principal” all costs are recognised as inventory up to the point of transfer to the allocated beneficiaries, whereafter the cost is expensed through the statement of financial performance.

Housing inventory is measured at the lower of cost and current replacement cost as houses will be distributed through a non-exchange transaction.

When the municipality is acting as the “agent” all transfers received by the Western Cape Department of Human Settlements is recorded initially as a liability in the statement of financial position. Any payments or costs pertaining to human settlement housing activities are debited against the liability.

1.14 Financial instruments

The municipality has various types of financial instruments and these can be broadly categorised as either financial assets or financial liabilities.

Accounting Policies

1.14 Financial instruments (continued)

A financial instrument is recognised if the municipality becomes a party to the contractual provisions of the instrument.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or un-collectability.

A concessionary loan is a loan granted to or received by a municipality on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss to the other party by failing to discharge an obligation.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by a municipality in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk. Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the municipality had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that the municipality designates at fair value at initial recognition, or those that are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

A financial asset is cash, a residual interest of another municipality, or a contractual right to receive cash or another financial asset from another, or to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the municipality.

The municipality measures all financial assets and financial liabilities after initial recognition by using the two categories of, financial instruments at fair value, or financial instruments at amortised cost.

The municipality has the following types of financial assets as reflected on the face of the statement of financial position or in the notes thereto:

Class:	**Category - measured at:**
Trade and other receivables from non-exchange transactions	Amortised cost
Trade and other receivables from exchange transactions	Amortised cost
Cash and cash equivalents	Amortised cost
Investments	Amortised cost

A financial liability is any liability that is a contractual obligation to deliver cash or another financial asset to another municipality. Loans payable are financial liabilities, other than short-term payables on normal credit terms.

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Accounting Policies

1.14 Financial instruments (continued)

Class:	Category - measured at:
Trade and other payables from non-exchange transactions	Amortised cost
Borrowings	Amortised cost
Finance lease liability	Amortised cost
Consumer deposits	Amortised cost

The municipality measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Financial assets, other than those measured at fair value, are assessed for indicators of impairment at the end of each reporting period. Financial assets are impaired where there is objective evidence of impairment. If there is such evidence the recoverable amount is estimated and an impairment loss is recognised in accordance with GRAP 104.

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised as revenue or expense in the statement of financial performance.

For financial assets and financial liabilities measured at amortised cost, a gain or loss is recognised in the statement of financial performance when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

The municipality derecognises a financial asset only when the contractual rights to the cash flows from the financial asset expire, are settled or waived, or when the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset, or when the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer.

In this case, the municipality derecognises the asset and recognises separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

The municipality removes a financial liability from its statement of financial position when it is extinguished, i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

The difference between the carrying amount of a financial liability extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in the statement of financial performance.

Interest relating to a financial instrument is recognised as revenue or expense in the statement of financial performance.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the municipality currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Short-term receivables and payables are not discounted where the initial credit period granted or received is consistent with the terms used in the public sector, either through established practices or legislation.

Accounting Policies

1.14 Financial instruments (continued)

Fair value measurement considerations:

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, a municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data. The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

1.15 Unauthorised expenditure

Unauthorised expenditure is defined as any expenditure incurred by a municipality not in accordance with section 15 or 11(3) of the MFMA, and includes an overspending of the total amount appropriated in the municipality's approved budget, an overspending of the total amount appropriated for a vote in the approved budget, an expenditure from a vote unrelated to the department or functional area covered by the vote, an expenditure of money appropriated not in accordance for that specific purpose, a spending of an allocation not in accordance with any conditions of the allocation, or a grant made by the municipality not in accordance with the MFMA.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

Refer to Annexure C (Capital expenditure by vote) and Annexure D (Operating expenditure by vote) where an analysis of the budgeted and actual expenditure is presented.

1.16 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act, Act 56 of 2003, the Municipal Systems Act, Act 32 of 2000, the Public Office Bearers Act, Act 20 of 1998, or is in contravention of the municipality's supply chain management policy.

Irregular expenditure is accounted for as expenditure in the statement of financial performance and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.17 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the statement of financial performance and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.18 Provisions

A provision is recognised when the municipality has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, and the amount of the obligation can be reliably estimated.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Accounting Policies

1.18 Provisions (continued)

When the effect of discounting is material, provisions are determined by discounting the expected future cash flows that reflect current market assessments of the time value of money. The impact of the periodic unwinding of the discount is recognised in the statement of financial performance as a finance cost.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Contingent liabilities and contingent assets and are not recognised, but are disclosed in note 56 and 57 respectively.

1.19 Leases

Municipality as lessee

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality through the lease agreement. Assets subject to finance leases are recognised in the statement of financial position at the inception of the lease, as is the corresponding finance lease liability.

Assets subject to operating leases, i.e. those leases where substantially all of the risks and rewards of ownership are not transferred to the lessee through the lease, are expensed over the course of the lease arrangement in the statement of financial performance.

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date; namely whether fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Assets subject to a finance lease are measured at the lower of the fair value of the assets and the present value of the future minimum lease payments. Subsequent to initial recognition these capitalised assets are depreciated over the contract term.

The finance lease liability recognised at initial recognition is measured at the present value of the future minimum lease payments. Subsequent to initial recognition this liability is carried at amortised cost, with the lease payments being set off against the capital and accrued interest. The allocation of the lease payments between the capital and interest portion of the liability is effected through the application of the effective interest rate method.

The finance charges resulting from the finance lease are expensed through the statement of financial performance. The finance cost accrual is determined using the effective interest method.

The lease expense recognised for operating leases is charged to the statement of financial performance on a straight-line basis over the term of the relevant lease. To the extent that the straight-lined lease payments differ from the actual lease payments the difference is recognised in the statement of financial position as either lease payments in advance (operating lease asset) or lease payments payable (operating lease liability) as the case may be. This resulting asset and/ or liability is measured as the undiscounted difference between the straight-line lease payments and the contractual lease payments.

The finance lease liabilities are derecognised when the municipality's obligation to settle the liability is extinguished. The assets capitalised under the finance lease are derecognised when the municipality no longer expects any economic benefits or service potential to flow from the asset.

The operating lease liability is derecognised when the municipality's obligation to settle the liability is extinguished. The operating lease asset is derecognised when the municipality no longer anticipates economic benefits to flow from the asset.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

Municipality as lessor

For those leases that meet the definition of a finance lease, where the municipality is the lessor, the municipality derecognises the asset subject to the lease at the inception of the lease. Along with the derecognition of the asset the municipality recognises a finance lease receivable. Finance lease income is allocated to between the finance lease receivable and finance income using the effective interest rate method and the resulting finance income is recognised in the statement of financial performance as it accrues.

Accounting Policies

1.19 Leases (continued)

For those leases classified as operating leases the asset subject to the lease is not derecognised and no lease receivable is recognised at the inception of the lease. Lease payments received under an operating lease are recognised as income in the statement of financial performance.

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date; namely, whether fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Finance lease receivables are recognised at an amount equal to the municipality's net investment in the lease. This net investment in the lease is calculated as the sum of the minimum future lease payments and unguaranteed residual value discounted over the lease term at the rate implicit in the lease.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined lease payments and the contractual lease payments are recognised as either an operating lease asset or operating lease liability. An operating lease liability is raised to the extent that lease payments are received in advance. The operating lease asset and / or operating lease liability are measured as the undiscounted difference between the straight-line lease receipts and the contractual lease receipts.

Finance lease receivables are derecognised when the municipality's right to the underlying cash flows expire or when the municipality no longer expects economic benefits to flow from the finance lease receivable.

Operating lease liabilities are derecognised when the municipality's obligation to provide economic benefits or service potential under the lease agreement expires. Operating lease assets are derecognised when the municipality's right to the underlying cash flows expire or the municipality no longer expects economic benefits to flow from the operating lease asset.

1.20 Revenue from exchange transactions

Revenue from exchange transactions refers to revenue that accrues to the municipality directly in return for services rendered or goods sold, the value of which approximates the consideration received or receivable, excluding indirect taxes, rebates and discounts.

Revenue from exchange transactions is only recognised once all of the following criteria have been satisfied:

The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;

The amount of revenue can be measured reliably; and

It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

Revenue from exchange transactions is measured at the fair value of the consideration received or receivable taking into account the amount of any trade discounts and volume rebates allowed by the municipality.

Revenue from interest earned is recognised, in the statement of financial performance, using the effective interest rate method.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licences and permits.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods are passed to the consumer.

Accounting Policies

1.20 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

The stage of completion of the transaction at the reporting date can be measured reliably; and

The cost incurred for the transaction and the cost to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. The stage of completion is determined by the proportion that costs incurred to date bear to the total estimated costs of the transaction.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

The municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;

The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;

The amount of revenue can be measured reliably;

It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and

The costs incurred or to be incurred in respect of the transaction can be measured reliably.

1.21 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Accounting Policies

1.21 Revenue from non-exchange transactions (continued)

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Transfers

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Fines

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are initially measured at its fair value at the date of acquisition, which is the best estimate of the inflow of economic benefits. The probability of non-payment is not considered at initial recognition.

The non-payment of traffic fines is estimated at subsequent measurement with reference to historical data and payment trend analysis. An impairment loss is recognised in surplus and deficit.

Where the municipality collects fines in the capacity of an agent, the fines will not be revenue of the municipality.

Bequests

Bequests that satisfy the definition of an asset are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality, and the fair value of the assets can be measured reliably.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in-kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

Except for financial guarantee contracts, the municipality recognise services in-kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Accounting Policies

1.21 Revenue from non-exchange transactions (continued)

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality discloses the nature and type of services in-kind received during the reporting period.

1.22 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.23 Borrowing costs

Borrowing costs are interest and other expenses incurred by the municipality in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.24 Employee benefits

Retirement benefits plans

The municipality provides retirement benefits for its employees and councillors. Retirement benefits consist of defined contribution plans and defined-benefit plans.

Defined-contribution plans are post-employment benefit plans under which a municipality pays fixed contributions into a separate entity (a fund), and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The contributions to fund obligations for the payment of retirement benefits are charged against the statement of financial performance in the year in which they become payable.

Defined-benefit plans are post-employment benefit plans other than defined-contribution plans. The defined-benefit funds are actuarially valued based on the projected unit credit method. Deficits identified are recovered through lump sum payments or increased future contributions on a proportional basis from all participating municipalities. The contributions and lump sum payments are charged against the statement of financial performance in the year in which they become payable.

Short-term and long-term employee benefits

Short-term employee benefits encompass all those benefits that become payable in the short-term, i.e. within a financial year or within 12 months after the financial year. Therefore, short-term employee benefits include remuneration, compensated absences and contractually agreed bonuses. No performance bonuses are paid by the municipality.

The cost of all short-term employee benefits is recognised during the period in which the employee renders the related service.

The municipality provides long-service awards to eligible employees, after completion of every five years' service and the liability thereof is based on an actuarial valuation. The projected unit credit method has been used to value the obligation.

Actuarial gains and losses on the long-term incentives are fully accounted for in the statement of financial performance.

Post-retirement healthcare aid plan

The municipality provides post-retirement benefits by subsidising the medical healthcare contributions of certain retired staff. According to the rules of the medical aid funds with which the municipality is associated, a member on retirement is entitled to remain a continued member of such medical aid fund, and the municipality will continue to subsidise medical contributions in accordance with the provisions of the employee's employment contract.

The liability in respect of current pensioners is regarded as fully accrued, and is therefore not split between a past, or accrued and future in-service element. The liability is recognised at the fair value of the obligation, together with any adjustments required. The projected unit credit method has been used to value the obligation. Refer to note 19.

Accounting Policies

1.24 Employee benefits (continued)

Multi-employer plans

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

The municipality classifies a multi-employer plan as a defined contribution plan or a defined benefit plan under the terms of the plan (including any constructive obligation that goes beyond the formal terms).

Where a plan is a defined benefit plan, the municipality accounts for its proportionate share of the defined benefit obligation, plan, assets and costs associated with the plan in the same manner as for any other defined benefit plan. When sufficient information is not available to use defined benefit accounting for a plan, that is a defined benefit plan, the municipality accounts for the plan as if it was a defined contribution plan.

1.25 Impairment of cash and non-cash generating assets

The municipality classifies its assets as non-cash generating assets as none of the assets on its own generates cash inflows or are held with the primary objective of generating a commercial return or profits. Although certain services realise surpluses surpluses are used for cross subsidisation of services that operate at a deficit.

At the end of each reporting period, the carrying amounts of non-cash-generating assets are reviewed to determine whether there is any indication of impairment. If any such indication exists, the recoverable amount or recoverable service amount of the asset is estimated in order to determine the extent of the impairment loss.

The recoverable service amount of a non-cash-generating asset is the higher of fair value less costs to sell, and value-in-use. The value-in-use is the present value of the remaining service potential of the asset, and is determined using the most appropriate of the depreciated replacement cost, restoration cost or service units approach.

The discount rate used reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount or recoverable service amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount or recoverable service amount. An impairment loss is recognised immediately in surplus or deficit.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount or recoverable service amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

1.26 Impairment of specific assets

Property plant and equipment

The calculation in respect of the impairment of property, plant and equipment is based on an assessment of the extent to which the recoverable amount of the asset has declined below the carrying amount. This was performed across all classes of property, plant and equipment.

Intangible assets

Intangible assets with indefinite useful lives as well as intangible assets not yet available for use are tested for impairment at the same time every year, as well as whenever there is an indication that the asset may be impaired.

Investment property held at fair value

The investment property was not tested for impairment as the impairment is taken into account with determination of the fair value at reporting date.

Accounting Policies

1.26 Impairment of specific assets (continued)

Heritage assets

The calculation in respect of the impairment of heritage assets is based on an assessment of the extent to which the recoverable amount of the asset has declined below the carrying amount. This was performed across all classes of heritage assets.

Trade receivables

The calculation in respect of the impairment of trade receivables is based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments. This was performed, as far possible, on individual debtor level and across all debtor classes.

1.27 Recognition of material transactions

When the final accounts have been closed, any transaction that occurs in respect of a prior period, is considered by management individually and collectively for materiality and the annual financial statements are amended with transactions that are material in amount or by nature.

1.28 Cash-backed reserves and provisions

In terms of the municipality's budget implementation and management, funds and reserves and virement policy the following reserves, provisions and liabilities are fully cash-backed and invested in short-term deposits:

Unutilised conditional grants

The balance of all conditional grants received where the conditions have not been met.

Housing development fund

The balance of the housing development fund that is administered in terms of and in accordance with the Housing Act, Act 107 of 1997.

Unspent loans

The balance of external loan funding received and not yet spent for the purpose why the loans were obtained.

Loan redemption reserve

The loan redemption reserve is defined as a cash-backed amount that consists of the portion of depreciation that is set aside for the redemption of external loans annually.

Provision for rehabilitation of landfill sites

The balance of the provision for the rehabilitation of landfill sites as provided for in terms of GRAP 19.

Employee benefits obligation

The balance of the employee benefit obligation as provided for in terms of GRAP 25.

Self-insurance reserve

A self-insurance reserve has been established to fund claims that may occur which will not be covered by external insurers.

Accounting Policies

1.28 Cash-backed reserves and provisions (continued)

Capital replacement reserve

This reserve serves the purpose of providing an internal funding source for the acquisition of capital assets and projects. The following sources of revenue are included in the capital replacement reserve:

- A percentage of the annual depreciation amount;
- Un-appropriated cash-backed surpluses to the extent that such surpluses are not required for operational purposes;
- Further cash surpluses appropriated as contributions in each annual or adjustments budget, as and when this can be afforded by the municipality;
- Revenue amounts equal to public contributions for bulk services contributions for funding of bulk services, i.e. capital contributions; and
- Net cash proceeds received from land sales. These net proceeds may only be utilised to fund municipal land development.

Consumer deposits

The balance of consumer deposits held in cash by the municipality.

Working Capital

An estimated amount approximately 1/12th of the total operating expenditure.

1.29 Related parties

The municipality has used the disclosure requirements as per GRAP 20 – Related party disclosures to formulate its accounting policy.

A related party is a person or an entity with the ability to control or jointly control the other party, or to exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Individuals as well as their close family members, and/or entities are therefore related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions.

Management is regarded as a related party and comprises the councillors, executive mayor, mayoral committee members, municipal manager, executive directors and all other managers reporting directly to the municipal manager or as designated by the municipal manager.

Close family members are regarded as those family members who may be expected to influence, or be influenced by that person in their dealings with the municipality. A person is considered to be a close member of the family of another person if they are married or live together in a relationship similar to a marriage, or are separated by no more than two degrees of natural or legal consanguinity or affinity.

The municipality operates in an economic environment currently dominated by entities directly or indirectly owned by the South African government. As a result of the Constitutional independence of all three spheres of government in South Africa, only parties within the same sphere of government will be considered to be related parties. Only transactions with such parties which are not at arm's length and not on normal commercial terms are disclosed.

Accounting Policies

1.30 Principal-agent arrangements

The municipality has used the principles of GRAP 109 - Accounting by Principals and Agents to formulate its accounting policy for principal-agent arrangements.

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on behalf and for its benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

When the municipality enters into binding agreements, it determines whether it is party to a principal-agent arrangement and assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that results from transactions with the parties are for the benefit of another entity or for its own benefit.

A principal recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement.

An agent recognises only that portion of the revenue and expense it receives or incurs while executing the transactions on behalf of the principal.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:
a) It does not have the power to determine the significant terms and conditions of the transaction.
b) It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
c) It is not exposed to variability in the results of the transaction.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the Standards of GRAP.

1.31 Capital Commitments

Capital commitments disclosed in the annual financial statements represent the contractual balance committed to capital projects on reporting date that will incurred in the period subsequent to the specific reporting date. The municipality discloses capital commitments exclusive of VAT.

1.32 Events after the reporting date

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date)

If non-adjusting events after the reporting date are material, the municipality discloses the nature and an estimate of the financial effect.

Notes to the Annual Financial Statements

Figures in Rand	2017	2016 Restated*

2. Cash and cash equivalents

Cash and cash equivalents consist of the following:

Cash on hand	24 710	22 710
Cash at bank	47 163 519	69 118 989
	47 188 229	**69 141 699**

Credit quality of cash at bank and short-term deposits, excluding cash on hand

The credit quality of cash at bank, excluding cash on hand that are neither past nor impaired can be assessed by reference to external credit ratings, if available, or historical information.

The municipality had the following bank accounts with Standard Bank SA Limited

Account description / number	Bank statement balances			Cash book balances		
	30 June 2017	30 June 2016	30 June 2015	30 June 2017	30 June 2016	30 June 2015

*A section 12 of the MFMA bank account was opened during the current financial year.

3. Inventories

Closing balance of inventories

Consumable stores	11 535 352	10 703 057
Top structures not transferred	-	64 015
Water	651 307	500 568
	12 186 659	**11 267 640**
Carrying value of inventories carried at fair value less costs to sell	12 186 659	11 203 625
Housing top structure carried at the lower of cost and current replacement cost	-	64 015

During the year stock issued from consumable stores amounted to R26 387 864 (2016: R25 032 089). An amount of R739 932 (2016: R439 452) for consumable stores were written off. R64 015 (2016: Rnil) for top structures and R106 311 825 (2016: R95 766 938) for water services were expensed in the statement of financial performance.

Figures in Rand	2017	2016 Restated*

4. Investments

Summary of investments (Section 125(2)(b) of the MFMA):

Short-term deposits	505 593 448	433 369 258
Institutions holding the deposits		
ABSA	119 338 751	86 975 328
First National Bank	70 878 274	62 928 008
Standard Bank	96 959 636	93 350 435
Nedbank	101 791 657	102 266 627
Investec	116 625 130	87 848 860
	505 593 448	**433 369 258**

The value of the investments has been measured at amortised cost using the effective interest rate method.

Short-term deposits are invested with various banking institutions for a period longer than three months, but not exceeding twelve months in accordance with the cash management and investment policy. This information is disclosed in terms of Section 125(2)(b) of the MFMA.

All unspent conditional grants and certain provisions and reserves, which are included in the short-term investments above, have been ring-fenced and may not be utilised for any other purposes.

The different institutions have external credit ratings from rating agencies.

Credit quality of trade and other receivables from exchange transactions

All trade receivables that are past due at the end of the reporting period are considered for impairment. It is expected that the trade receivables not impaired will be received by the municipality.

Trade and other receivables from exchange transactions impaired

The municipality calculated the payment trend of each client for the year, in order to ensure that trade and other receivables from exchange transaction are disclosed at fair value.

Bad debts of R16 424 035 (2016: R4 712 643) were written off during the year.

6. Trade and other receivables from non-exchange transactions (continued)

Credit quality of trade and other receivables from non-exchange transactions

All trade receivables that are past due at the end of the reporting period are considered for impairment. It is expected that the trade receivables not impaired will be received by the municipality.

Trade and other receivables from non-exchange transactions

Summary by ageing - Property rates		
Current (0 - 30 days)	4 463 761	6 759 099
31 - 60 days	785 068	609 836
61 - 90 days	544 268	506 171
91 - 120 days	457 624	472 746
121 - 365 days	2 377 371	2 997 804
> 365 days	8 528 800	10 422 562
	17 156 892	**21 768 218**

Trade and other receivables from non-exchange transactions impaired

The municipality calculated the payment trend of each client for the year, in order to ensure that receivables from non-exchange transactions are disclosed at fair value.

Bad debts of R10 060 127 (2016: R708 570) were written off during the year.

7. Prepayments

Prepaid expenses	3 192 604	3 245 855

8. Operating leases

Current assets	184 023	186 963
Current liabilities	(206 817)	(174 102)
	(22 794)	**12 861**

Operating leases - as lessee (expense)

At the reporting date the municipality had outstanding commitments under operating leases which fall due as follows:

Minimum lease payments due		
- within one year	2 870 319	2 602 968
- in second to fifth year inclusive	1 372 996	4 089 984
	4 243 315	**6 692 952**

Operating lease payments represent rentals payable by the municipality for certain of its office properties. No contingent rent is payable. The term pertaining to the leases ranges from 1 to 3 years (2016: 1 to 3 years) and escalation rates vary from 8% to 10% (2016: 8% to 10%) per year.

Notes to the Annual Financial Statements

Figures in Rand	2017	2016 Restated*

8. Operating leases (continued)

Operating leases - as lessor (income)

Minimum lease payments due		
- within one year	831 357	1 414 850
- in second to fifth year inclusive	546 522	1 016 719
	1 377 879	**2 431 569**

Operating leases consist of rentals on the letting of premises. Lease agreements are non-cancellable and have terms from 1 to 10 years (2016: 1 to 10 years). The escalation rates of the lease agreements vary from 5% to 12% (2016: 5% to 12%). There are no contingent rents receivable.

9. VAT receivable

VAT receivable by the municipality	3 852 879	3 968 749

VAT is payable on the payment basis. VAT is paid over to SARS on a net basis only when actual payments are received by the municipality and when actual payments are made to suppliers. The balance above is inclusive of accruals and provisions, where relevant.

10. Property, plant and equipment (continued)

Other information:

Provision has been made for the estimated cost of rehabilitating landfill sites, included in other assets, as disclosed in note 20.

Infrastructure assets were assessed during the year to determine whether there are any indicators of impairment. Refer to note 62.

All moveable assets were reviewed for changes in usefull life and conditions. This resulted in changes of accounting estimates which was applied prospectively. Refer to note 49.

All completed infrastructure projects were unbundled.

Pledged as security

No assets are pledged as security for external borrowings. Refer note 17.

Other information

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

10. Property, plant and equipment (continued)

The following projects have been been identified as taking significantly longer than expected to complete or halted:

Significant longer to complete:	**Amount**
Investigate and design sewerage works: Brittania Bay	2 879 936
Investigate and design sewerage works: Jacobs Bay	756 891
Upgrade purification works: Vredenburg	12 525 817
Halted:	
Paving parking area: Langebaan	47 966
Stormwater system: Vredenburg	443 905
Streetlights: Vredenburg / Saldanha road and crossings	57 000
Roads: St Helena Bay (Sandy Point)	36 416
Roads: St Helena Bay (Laingville)	541 688
	17 289 619

Investigate and design sewerage works: Brittania Bay

The initial project completion date was anticipated to be 30 June 2017, however there was delays with the investigation and design of the sewerage works. The project is currently in the construction phase and it is anticipated to be completed by 2 July 2019.

Investigate and design sewerage works: Jacobs Bay

The initial project completion date was anticipated to be 30 June 2017, however there was delays with the investigation and design of the sewerage works. The project is currently in the construction phase and it is anticipated to be completed by 2 July 2019.

Upgrade purification works: Vredenburg

The initial project completion date was anticipated to be 30 June 2017, however there was delays with the purification works. The project is currently in the construction phase and it is anticipated to be completed by 2 July 2019.

Paving parking area: Langebaan

The project has been put on hold until the third phase of the Oostewal street construction commences.

Stormwater systems: Vredenburg

The project was halted and shifted to the outer-years due to budget restrictions.

Streetlights Vredenburg / Saldanha road and crossing

The project was halted due to the Provincial Department not giving SBM permission to start with the project.

Roads: St Helena Bay (Sandy Point)

The project was halted due to availability of the Eskom capacity.

Roads: St Helena Bay (Laingville)

The project was halted due to availability of the Eskom capacity.

12. Investment property (continued)

Details of valuation

The date of the most recent revaluations was on 30 June 2017. The valuation was performed by Mr Igshaan Oosterwyk, an employee of SBM. Mr Oosterwyk is a registered Professional Associated Valuer with the SA Council for Valuers Profession, registration number 5902, and member of the SA Institute of Valuers and has the appropriate experience in performing valuation of investment properties.

The valuation for the land portion was based on adapted comparable sales and for the improvements there-on on replacement costs.

All assumptions used were based on current market conditions.

The investment property has not been pledged as security.

17. Borrowings

Borrowings at amortised cost	127 143 310	82 177 384

Non-current liabilities	118 439 886	72 605 116
Current liabilities	8 703 424	9 572 268
	127 143 310	**82 177 384**

Balance at the beginning of the year	82 177 384	42 549 178
Loans redeemed	(13 214 074)	(7 431 794)
New loans	58 180 000	47 060 000
Balance at year end	**127 143 310**	**82 177 384**

Long-term liabilities have been utilised in accordance with the MFMA.

Pledged as security

No assets were pledged as security for external borrowings.

Long term borrowings are repaid over periods varying from 10 to 15 years (2016: 10 to 15 years) and at interest rates varying from 6.75% to 11.86% (2016: 6.75% to 11.86%) per annum.

The amortised cost of the long-term liabilities was determined after considering the standard terms and conditions of agreements entered into between the municipality and the relevant financing institutions.

Notes to the Annual Financial Statements

Figures in Rand	2017	2016 Restated*

18. Finance lease obligation

Minimum lease payments due		
- within one year	100 105	-
- in second to fifth year inclusive	75 080	-
less: future finance charges	(101 779)	-
	73 406	**-**
Present value of minimum lease payments due		
- within one year	24 892	-
- in second to fifth year inclusive	48 514	-
	73 406	**-**
Non-current liabilities	48 514	-
Current liabilities	24 892	-
	73 406	**-**

The term period pertaining to this lease is two years. Interest rates are linked to the prime interest rate at the contract date. The lease has fixed repayments and no arrangement has been enterred into for contingent rent. The municipality's obligation under the finance lease is secured by the lessor's charge over the leased asset.

Figures in Rand	2017	2016 Restated*

19. Employee benefit obligation

Total employee benefit obligation liability		
Present value of post-retirement healthcare benefits	93 356 783	90 131 643
Present value of long-service awards	14 943 270	14 752 840
Staff bonuses	8 254 550	7 656 993
Staff leave	13 342 397	13 026 009
	129 897 000	**125 567 485**

The liability is split between:

Non-current liabilities		
Present value of the post-retirement healthcare benefits	89 694 737	87 171 015
Present value of the long-service awards	13 118 444	13 417 744
	102 813 181	**100 588 759**

Current liabilities		
Present value of the post-retirement healthcare benefits	3 662 046	2 960 628
Present value of the long-service awards	1 824 826	1 335 096
Staff bonuses	8 254 550	7 656 993
Staff leave	13 342 397	13 026 009
	27 083 819	**24 978 726**

The actuarial valuation was performed by Chanan Weiss from ARCH Actuarial Consulting CC (Registration 1998/023194/23). ARCH Actuarial Consulting CC is not connected to the municipality.

Reconciliation of employee benefit obligations

19.1 Post-retirement healthcare benefit

Defined benefit plan

Present value of the unfunded defined benefit obligation	93 356 783	90 131 643
Non-current liabilities	89 694 737	87 171 015
Current liabilities	3 662 046	2 960 628
	93 356 783	**90 131 643**

Changes in the present value of the unfunded defined benefit obligation:

Opening balance	90 131 643	86 588 882
Benefits paid	(3 276 533)	(2 884 134)
Net expense recognised in the statement of financial performance	6 501 673	6 426 895
Closing balance	**93 356 783**	**90 131 643**

Net expense recognised in the statement of financial performance:		
Employee cost	4 685 779	5 342 931
Actuarial gain	(6 132 590)	(6 445 797)
Finance cost	7 948 484	7 529 761
	6 501 673	**6 426 895**

19. Employee benefit obligation (continued)

The post-retirement healthcare benefit is a defined benefit plan and consists of the fixed contribution percentage that is paid to various medical aid plans by the municipality consisting of LA Health, Key Health, Bonitas, Fed Health, Samwumed and Hosmed.

The employees of the municipality and their dependants are currently entitled to a subsidy of 70% of the medical scheme contributions after they retire or in the case of death. This percentage is reduced if an employee did not complete a required service period before retirement. Widow(er)s and orphans of in-service members are entitled to a subsidy of 60% of the contribution payable. Upon a member's death-in retirement, the surviving dependants will continue to receive the same benefits.

Key assumptions used for the post-retirement healthcare benefit

	2017	**2016**
Key financial assumptions		
Discount rate	9.62%	9.03%
CPI	6.40%	6.55%
Health care cost inflation rate	7.90%	8.13%
Net effective discount rate	1.59%	0.83%

	2017	**2016**
Key demographic assumptions		
Average retirement age	63	63
Continuation of membership at retirement	100%	100%
Proportion assumed married at retirement	90%	90%
Proportion of eligible current non-member employees joining the scheme by retirement	5%	5%
Mortality during employment	SA85-90	SA85-90
Mortality post-retirement	PA(90)	PA(90)

Withdrawals

Allowance was made for the withdrawals of existing members and the assumed withdrawal rates as listed below:

Age	**Females**	**Males**
20-29	24%	16%
30-39	18%	12%
40-49	10%	8%
50-54	4%	4%
55	2%	2%
55+	0%	0%

Discount rate

GRAP 25 stipulates that the choice of this rate should be derived from government bond yields consistent with the estimated term of the post-employment liabilities. However, where there is no deep market in government bonds with a sufficiently long maturity to match the estimated term of all the benefit payments, current market rates of the appropriate term should be used to discount shorter term payments, and the discount rate for longer maturities should be estimated by extrapolating current market rates along the yield curve.

Consequently, a discount rate of 9.62% (2016: 9.03%) per annum has been used. The corresponding index-linked yield at this term is 2.55% (2016: 1.78%). These rates were deduced from the yield curve obtained from the Bond Exchange of South Africa after the market close on the reporting date.

Family profile

It has been assumed that female spouses will be five years younger than their male counterparts. Further, it was assumed that 90% of eligible employees on a healthcare arrangement at retirement will have an adult dependant. For current retiree members, actual marital status was used and the potential for remarriage was ignored.

19. Employee benefit obligation (continued)

Medical scheme option

It has been assumed that in-service members and continuation members will remain on the same medical scheme and option. In-service non-members were assumed to join Samwumed Option B, should they join a scheme by retirement and continue to receive the post-employment subsidy.

Sensitivity analysis on the accrued liability (R millions) for the financial year ended 30 June 2017.

Assumption	Change	In-service	Continuation	Total	% change
Central assumptions		46.229	47.128	93.357	
Healthcare inflation	+1%	56.158	51.913	108.071	16%
	-1%	38.392	42.991	81.383	-13%
Discount rate	+1%	38.564	43.086	81.650	-13%
	-1%	56.084	51.879	107.963	16%
Post-retirement mortality	-1 yr	47.797	48.914	96.710	4%
Average retirement age	-1 yr	48.557	47.128	95.685	2%
Continuation of membership at retirement	-10%	37.297	47.128	84.425	-10%

Sensitivity analysis on current-service and interest costs (R millions) for financial year ended 30 June 2017.

Assumption	Change	Service cost	Interest cost	Total	% change
Central assumptions		4.683	7.952	12.634	
Healthcare inflation	+1%	5.799	9.303	15.102	20%
	-1%	3.818	6.862	10.680	-15%
Discount rate	+1%	3.866	7.640	11.507	-9%
	-1%	5.748	8.274	14.022	11%

** Insufficient information provided in previous report.*

Employer's best estimate of contributions expected to be paid in respect of the healthcare benefit obligation:

	2019	2018
Estimated contribution	R3 951 407	R3 662 046

Figures in Rand	2017	2016 Restated*

19. Employee benefit obligation (continued)

19.2 Long-service awards

Other long-term employee benefit obligation		
Present value of the unfunded accrued liability	14 943 270	14 752 840
Non-current liabilities	13 118 444	13 417 744
Current liabilities	1 824 826	1 335 096
	14 943 270	**14 752 840**

Changes in the present value of the liability:

Opening balance	14 752 840	13 569 075
Benefits paid	(1 266 837)	(825 384)
Net expense recognised in the statement of financial performance	1 457 267	2 009 149
Closing balance	**14 943 270**	**14 752 840**

Net expense recognised in the statement of financial performance:

Current service cost	1 348 504	1 303 888
Finance cost	1 219 085	1 058 810
Actuarial gain	(1 110 322)	(353 549)
	1 457 267	**2 009 149**

The long-service award is payable after every five years of continuous service. The long service award provision is an estimate of the liability based on the current staff turnover. All permanent employees are entitled to a specified number of days additional leave plus additional remuneration based on their completed years of service. The employee may convert the additional leave into a cash amount. At the end of 30 June 2017 the total number of employees was 960 (2016: 979).

Key assumptions used for the long-service awards

Discount rate

GRAP 25 stipulates that the choice of this rate should be derived from government bond yields consistent with the estimated term of the employee benefit liabilities. However, where there is no deep market in government bonds with a sufficiently long maturity to match the estimated term of all the benefit payments, current market rates of the appropriate term should be used to discount shorter term payments, and the discount rate for longer maturities should be estimated by extrapolating current market rates along the yield curve.

Consequently, a discount rate of 8.57% (2016: 8.65%) per annum has been used. The first step in the derivation of this yield is to calculate the liability-weighted average of the yields corresponding to the actual terms until payment of long-service awards, for each employee. The 8.57% (2016: 8.65%) is then derived as the liability-weighted average of the yields derived in the first step. The corresponding liability-weighted index-linked yield is 2.54% (2016: 1.74%). These rates do not reflect any adjustment for taxation. These rates were deduced from the yield curve obtained from the Bond Exchange of South Africa after the market close on the reporting date.

The liability-weighted average term of the total liability is 8.42 years.

19. Employee benefit obligation (continued)

	2017	2016
Key financial assumptions		
Discount rate	8.57%	8.65%
Consumer price inflation	6.40%	6.29%.
Normal salary inflation rate	CPI plus 1%	CPI plus 1%
Normal salary increase rate	7.36%	7.29%
Net effective discount rate	2.05%	1.26%
Key demographic assumptions		
Average retirement age	63	63
Mortality during employment	SA85-90	SA85-90
Mortality post-retirement	PA(90)	PA(90)

Withdrawal
The assumed rates of withdrawal from service are set out below:

Age	Females	Males
20-29	24%	16%
30-39	18%	12%
40-49	10%	8%
50-54	4%	4%
55	2%	2%
55+	0%	0%

Normal salary inflation rate
The assumed rate of salary inflation was set as the expected future CPI plus 1%. In addition to the normal salary inflation rate, the following promotional salary increases were assumed:

Age	Promotional increase
20 - 24	5%
25 - 29	4%
30 - 34	3%
35 - 39	2%
40 - 44	1%
45+	0%

LSA arrangement assumptions
It was assumed that the employer's LSA arrangements would remain and that the level of benefits in respect of such, would remain unchanged, with the exception of allowing for inflationary adjustments.

19. Employee benefit obligation (continued)

19.5 Multi-employer plans

Retirement benefit information

The municipality makes provision for post-retirement benefits to eligible councillors and employees who belong to different pension schemes. These funds are governed by the Pension Funds Act and include both defined benefit and defined contribution schemes.

The only obligation for the municipality with respect to the retirement benefit plans is to make the specified contributions. Where councillors / employees leave the plans prior to full vesting of the contributions, the contributions payable by the municipality are reduced by the amount of forfeited contributions. The total expense recognised in the Statement of Financial Performance for employees comprises R28 559 311 (2016: R27 408 964) and councillors of R283 430 (2016: R221 325) respectively and represents contributions payable to these plans by the municipality at rates specified in the rules of the plans.

These schemes are subject to a tri-annual, bi-annual or annual actuarial valuation as set out hereunder. The amounts included are the latest available actuarial valuations for the fund.

LA Retirement Fund:

The LA Retirement Fund operates both as a defined benefit and defined contribution scheme.

Defined benefit scheme

The contribution rate payable under the defined benefit section is 27%, 9% by the members and 23.06 % (period 1 February 2012 - 30 June 2014) and 26.77% (period 1 July 2014 - 30 June 2015) by their councils. The actuarial valuation report at 30 June 2015 disclosed an actuarial valuation amounting to R2 136 012 000 (30 June 2014 : R3 631 518 000), with a nett accumulated surplus of R28 015 000 (2014 : R23 343 000), with a funding level of 101.4% (30 June 2014 : 104.4%).

Defined contribution scheme

The actuarial valuation report at 30 June 2015 indicated that the defined contribution scheme of the fund is in a sound financial position, with assets amounting to R1 932 720 000 (30 June 2014: R566 689 000), net investment reserve of Rnil (30 June 2013: R787 000) and with a funding level of 100% (2014: 100%).

The actuary concluded that:

- the future service contribution rate shortfall amounts to 5.34% of salary in respect of 29 remaining DB active members as at the valuation date;

19. Employee benefit obligation (continued)

- the Trustees granted a pension increase of 3% effective 1 January 2016 and a pensioner bonus of 75% of monthly pension payable in December 2015. Pro-rata pension increases and bonus apply for pensions in payment for less than one year;
- the underlying asset portfolios were not aligned with the Members' Shares and Fund accounts at the valuation date; and
- the direct property assets of R390.2 million form a relatively high proportion at 18.8% of the assets of the Pensioner Account. In my opinion, a proportion of between 0% and 10% would be more appropriate to avoid an over-concentration in one asset class.

It is to be noted that :

- all the active members have now all been converted to the DC Section;
- there is no longer any contribution rate shortfall as this only applied to 29 residual DB Section active members, that have now also converted to the DC Section; and
- both the DC Section and the DB Section were fully funded as at the valuation date.

The actuary certified that the Pensioner Account was 101.4% funded with a surplus of R28.0 million and is in a sound financial condition. The funding level in respect of the DB active members was 153.1% with a surplus of R21.9 million. The DB Section is in a sound financial condition and the DC Section has a funding level of 100% and is in a sound financial condition. Overall the fund is in a sound financial condition with a surplus of R50.0 million and an overall funding level of 101.2%. The nature of the assets is suitable for the fund, except that the proportion of direct property underlying the pensioner liabilities may represent an over-concentration of assets in this class. The assets are appropriately matched relative to the term and nature of the active member liabilities. The fund's investment strategy is suitable. Finally the risk benefits are partially re-insured and this is appropriate for the size and nature of the Fund.

The municipality has 9 employees and 14 Councillors that are members on this fund as at 30 June 2017 .

Cape Joint Retirement Fund:

The statutory valuation performed as at 30 June 2016 revealed that the assets of the fund amounted to R19 356 440 000 (30 June 2015: R18 322 177 000), with funding levels of 118% and 100.5% (30 June 2015: 112.1% and 100%) for the Pensions Account and the Share Account respectively. The Preservation Pension Account showed a suplus of Rnil and was 100% funded for both 2016 & 2015. The contribution rate paid by the members (7,50%/9%) and the municipalities (19,50%/18%) is sufficient to fund the benefits accruing from the fund in the future. The actuary certified that the structure of the assets is appropriate relative to the nature of the liabilities, given normal circumstances and that the Fund is in a sound financial condition as at the valuation date.

The municipality has 755 employees that are members of this fund as at 30 June 2017.

South African Municipal Workers Union National provident fund:

The SAMWU National Provident Fund is a defined contribution scheme. Members contribute at a rate of not less than 7.5% of salaries, as required by the rules. The employers contribute at a total rate of not less than 18%. The statutory valuation performed as at 30 June 2014 revealed that the assets of the fund amounted to R6 574 775 000 (30 June 2011: R4 021 622 000), with funding levels of 111.7% (30 June 2011: 111.1%). The investment smoothing reserve has remained unchanged at 4.6% of the market value of assets (or 5.5% of members' fund credits and the data reserve). The actuary certified that based on the 2014 valaution the fund's assets are sufficient to cover the members' fund credits, risk benefits reserve and the data reserve and to provide for an investment smoothing reserve of 5.55% of members' fund credits as at 30 June 2014. In addition, there is a substantial surplus of some R689.1 million. The fund is therefore in a very sound financial position. The municipality has 199 employees that are members of this fund as at 30 June 2017.

19. Employee benefit obligation (continued)

The Municipal Councillors Pension Fund:

The Municipal Councilors Pension Fund operates as a defined contribution scheme. The statutory valuation performed as at 30 June 2015 revealed that the assets of the fund amounted to R2 551 861 000 (30 June 2014: R2 229 410 000), with funding levels of 101.08% (30 June 2014: 98.83%). The contribution rate paid by the members (13,75%) and council (15%) is sufficient to fund the benefits accruing from the fund in the future. The acturay certified that the fund was in a sound financial condition as at 30 June 2015, in that the assests of the fund were sufficient to cover the accrued service liabilities including the recommended contingency reserves in full. The municipality has 1 councillors that are members of this fund.

South African Local Authorities Pension Fund:

The pension fund operates both as a defined benefit and defined contribution scheme.

The statutory valuation performed as at 1 July 2015 revealed that the assets of the fund amounted to R13 413 300 000 (30 June 2014: R12 658 200 000), with funding levels of 100% (30 June 2014: 100%). The highest contribution rate paid by the members was 7.92% and by Council 20.78%.

It is the actuary's opinion that:

- they are satisfied with the investment strategy of the fund;
- the nature of the assets is, in their opinion, suitable for the nature of the liabilities of the fund as defined in the rules of the fund;
- the matching of assets with the liabilities of the fund is adequate; and
- the insurance arrangements are appropriate compared to the cover provided can be regarded as financially sound at the valuation date.

National Fund for Municipal Workers:

The fund operates as a defined contribution fund and in terms of the rules of the fund category A and category C members contribute at a rate as agreed upon by the Local Authority and the member, subject to an absolute minimum contribution of 2% and 5% of their remuneration respectively.

The Local Authority must contribute in respect of category A and category C members such an amount as agreed between the Local Authority and the fund, subject to a minimum contribution rate of 2% and 5% of their remuneration respectively. Category B members are members who belong to both category A and C and the Local Authority must, on behalf of such members, not contribute less than 7% of their remuneration. The contribution rates stipulated above include the amount payable towards the insured risk benefits policy.

The statutory valuation performed as at 30 June 2015 revealed that the assets of the fund amounted to R10 050 029 000 (30 June 2014 : R9 031 759 000), with funding levels of 100.42% (30 June 2014: 100.10%). The actuary certified that the assets of the fund are sufficient to cover 100.42% of the members' liabilities, also that it can be expected that the funding level of a fund of this nature will fluctuate around 100%, for example due to timing differences in investment and receipt of monies, slight mismatching of assets and liabilities and processing errors.

20. Provisions

Environmental rehabilitation provision

Provision for rehabilitation of landfill sites	87 024 631	84 185 302

Non-current liabilities	76 401 105	81 704 791
Current liabilities	10 623 526	2 480 511
	87 024 631	**84 185 302**

Reconciliation of provisions - 2017

	Opening Balance	Additions	Utilised during the year	Reduction due to re-measurement or settlement without cost to entity	Total
Provision for rehabilitation of landfill sites	84 185 302	5 472 832	(2 633 503)	-	87 024 631

Reconciliation of provisions - 2016

	Opening Balance	Additions	Utilised during the year	Reduction due to re-measurement or settlement without cost to entity	Total
Provision for rehabilitation of landfill sites	95 405 435	6 249 059	(1 622 280)	(15 846 912)	84 185 302

There are fives sites under consideration, being the Vredenburg landfill, Langebaan landfill, Saldanha (Kalkrug) landfill and two landfill sites in Hopefield. A reconciliation of the environmental rehabilitation provision for these sites is provided below.

	Date of proposed rehabilitation		
Langebaan	1 March 2017	14 093 378	15 755 136
Vredenburg	1 July 2018	54 414 816	51 053 856
Hopefield (1)	30 June 2020	4 044 319	3 795 003
Hopefield (2)	30 June 2020	4 569 969	4 288 582
Kalkrug	1 July 2019	9 902 149	9 292 725
		87 024 631	**84 185 302**

The estimation of the liability to rehabilitate the landfill sites was performed by Jan Palm Consulting Engineering CC, a firm of specialist waste management consultants. The firm is registered with the South African Council of Engineers (registration no 870047). Jan Palm Consulting Engineering CC is not connected to the municipality.

An appropriate discount rate, based on CPI was used to determine the present value of the future environmental rehabilitation liability.

The funds to rehabilitate these landfill sites are included in the short-term investments. The funds are ring-fenced to ensure that this liability is cash-backed.

Municipal	552 914 482	537 618 000
Small holdings and farms	1 996 853 650	2 063 104 150
Other	761 570 847	371 052 387
Total property valuations	**27 236 777 111**	**27 014 971 671**

Valuations on land and buildings are performed every four years. The last valuation came into effect on 1 July 2013. Interim valuations are processed on a regular basis and when needed to take into account changes in individual property values due to alterations and subdivisions.

A residential rate of 0.6648 cents in the Rand (2016: 0.6331 cents in the Rand) was used to determine assessment rates on categories based on the following ratios:

Residential property	1:1
Residential business	1:1.4
Private open spaces	1:1
Residential nature reserve	1:0.3
Public service infrastructure property	1:0.15
Public benefit organisation property	1:0.25
Agricultural property	1:0.10

Rates are levied on an annual or monthly basis.

30. Interest earned - outstanding property rates receivables

Property rates	3 119 575	2 608 532

The municipality levies interest on rates outstanding after the due date for payment at prime +1% per annum (2016: prime + 1%).

31. Government grants and subsidies

Operating grants

Equitable share	62 832 000	55 497 000
Expanded Public Works Programme Grant (EPWP)	1 071 000	999 999
Financial Management Grant (FMG)	1 380 349	1 358 035
Municipal Infrastructure Grant (MIG)	926 600	944 650
Municipal Systems Improvement Grant (MSIG)	-	125 918
Public Transport Infrastructure Grant (PTIS)	126 000	107 000
Regional Socio-Economic Project (RSEP)	587 850	205 514
SETA - Skills Development Grant	181 403	558 125
Financial Management Support Grant (FMSG)	374 326	177 050
Library Grant	6 268 000	5 537 998
Thusong Centre	58 000	-
Other operating government grants and subsidies	742 045	869 217
Community Development Workers Grant (CDW)	74 168	34 594
	74 621 741	66 415 100

Capital grants

Government grants and subsidies	42 580 650	63 694 520
	117 202 391	**130 109 620**

Split between:

Conditional grants and subsidies	54 370 391	74 612 620
Unconditional grants and subsidies	62 832 000	55 497 000
	117 202 391	**130 109 620**

Equitable share

In order to qualify for a 100% indigent subsidy, the qualifying income for a household must be R4 300 or less per month. The income limits for seasonal workers will be calculated over a period of one year.

The second category is based on an income of R5 350 per month, such households will receive an indigent subsidy of 70% of the above-mentioned category.

All indigent subsidies are funded from the equitable share.

Changes in level of government grants

Based on the allocations set out in the Division of Revenue Act, (Act No. 10 of 2014), no significant changes in the level of government grant funding is expected over the forthcoming three financial years.

* See Note 50 & 46

Notes to the Annual Financial Statements

Figures in Rand	2017	2016 Restated*

32. Fines

Traffic fines	33 629 204	30 309 381
Library books	46 532	43 758
Buildings inspections	-	9 358
	33 675 736	**30 362 497**

Key assumptions made with the recognition of revenue on traffic fines:

Revenue from traffic fines is recognised on a net basis after adjusting the fines issued for the probability of the traffic fines being withdrawn, reduced, written off (struck off) or the offender being given a rebate when settling the traffic fine. Based on past history, 18.64% (2016: 24.45%) of all fines issued will be withdrawn, reduced, written off (struck off) or the offender will be given a rebate when settling the traffic fine.

33. Other income

VAT on DORA grants	3 216 327	2 413 129
Donated assets	-	19 354 532
	3 216 327	**21 767 661**

The municipality received services in-kind under voluntary or non-voluntary schemes which included free training, workshops and technical assistance from government departments and entities. These services in-kind have not been recognised as they were assessed not to be significant to the municipality's operations and/or basic service delivery objectives. The cost and fair value of these services in-kind could also not be measured reliably.

34. Employee related costs

Acting allowance	1 695 322	1 766 910
Bargaining council levy	89 157	85 283
Basic salaries	171 776 239	159 638 081

46. Prior period errors and change in accounting policy (continued)

Trade and other receivables from exchange transactions

The municipality incorrectly recognised money paid by a debtor as revenue instead of allocating it against the debtor's account.

The municipality incorrectly disclosed VAT under trade receivables.

Operating lease asset

Correction of an operating lease asset as the contracts expired which were included in the operating lease asset at year-end.

VAT receivable

The municipality incorrectly disclosed VAT under trade receivables.

Property, plant and equipment

The provision for rehabilitation of the langebaan landfill site was not calculated using the latest available closure license. A closure license for this landfill was issued on 2 February 2016 and had less requirements than originally anticipated.
The cost incurred to rebuild the Vredenburg train stations were incorrectly allocated to work-in-progress for property, plant and equipment.

Heritate assets
The cost incurred to rebuild the Vredenburg train stations were incorrectly allocated to work-in-progress for property, plant and equipment.

Unspent conditional grants

Interest earned on grant funding held in a trust account to purchase land for the Vredenburg Urban Renewal Project was not accrued to the unspent conditional grant for the project.

Employee benefit obligation

The municipality ommited one employee when the employee benefit valuation was performed.

Provisions

The provision for rehabilitation of the langebaan landfill site was not calculated using the latest available closure license. A closure license for this landfill was issued on 2 February 2016 and had less requirements than originally anticipated. The short term portion of the liability is now also recognised.

46. Prior period errors and change in accounting policy (continued)

Statement of Financial Performance for the year ended 30 June 2016

	As previously reported	Correction of error	Reclassifying adjustments	Restated*
Revenue				
Revenue from exchange transactions				
Rental of facilities and equipment	13 897 700	(50 054)	-	13 847 380
Expenditure				
Employee related costs	265 459 945	(3 770 453)	-	261 689 492
Remuneration of councillors	9 093 226	(84 520)	-	9 008 706
Finance costs	19 464 524	388 718	-	19 853 242
Repairs and maintenance - goods and services from suppliers	33 566 572	(33 566 572)	-	-
Contracted services	5 476 355	20 394 829	30 460 970	56 332 154
General expenses	85 180 687	17 061 948	(30 460 970)	71 781 665

Actuarial gains	7 368 860	(569 514)	-	6 799 346
Gains on reversal of provision	-	7 511 366	-	7 511 366
	7 368 860	**6 941 852**	**-**	**14 310 712**
Deficit for the year	**(396 974 749)**	**6 467 848**	**-**	**(390 507 167)**

Rental of facilities and equipment

Correction of an operating lease asset as the contracts expired which were included in the operating lease asset at year-end.

Employee related costs

SDL and WCA was included as part of employee cost and is now re-classified and disclosed seperately as part of general expenditure as the expenditure incurred is regards as an operational cost and not employee benefit costs.

Remuneration of councillors

SDL was included as part of remuneration of councillors and is now re-classified and disclosed seperately as part of general expenditure as the expenditure incurred is regards as an operational cost and not remuneration.

Finance costs

Interest earned on grant funding held in a trust account to purchase land for the Vredenburg Urban Renewal Project was not accrued to the unspent conditional grant for the project.

Repairs and maintenance - goods and services from suppliers

ASB FAQs released in March 2017 concluded that an entity that previously incorrectly presented repairs and maintenance expenditure on the face of the statement of financial performance should reclassify such expenditure by its nature. The expenditure is now reclassified to contracted services (other contractors) and to general expenses (stocks and material) to correctly reflect the nature of the expenditure.

Contracted services

ASB FAQs released in March 2017 concluded that an entity that previously incorrectly presented repairs and maintenance expenditure on the face of the statement of financial performance should reclassify such expenditure by its nature. The expenditure is now reclassified to contracted services (other contractors) and to general expenses (stocks and material) to correctly reflect the nature of the expenditure.

46. Prior period errors and change in accounting policy (continued)

The municipality reclassified expenditure from general expenditure to contracted services (other contractors) in order to make the nature of expenditure clear to the users of financial statements and to align to practise within local government. This will enhance the compatibility of the financial statements disclosure with other municipalities. The line items re-classified relate to services provided by external service provides and are as follows, digging and expansion of graves, external toilets, legal expenses, operating: Landfill site, printing and stationary, rental of others, sanitary services, Security costs, valuation costs and training.

General expenses

SDL and WCA was included as part of employee cost and remuneration of councillors is now re-classified and disclosed seperately as part of general expenditure as the expenditure incurred is regards as an operational cost and not remuneration.

Commission paid to contractors for contracted services was incorrectly allocated to general expenses and is now corrected.

ASB FAQs released in March 2017 concluded that an entity that previously incorrectly presented repairs and maintenance expenditure on the face of the statement of financial performance should reclassify such expenditure by its nature. The expenditure is now reclassified to contracted services (other contractors) and to general expenses (stocks and material) to correctly reflect the nature of the expenditure.

The municipality reclassified expenditure from general expenditure to contracted services (other contractors) in order to make the nature of expenditure clear to the users of financial statements and to align to practise within local government. This will enhance the compatibility of the financial statements disclosure with other municipalities. The line items reclassified relate to services provided by external service provides and are as follows, digging and expansion of graves, external toilets, legal expenses, operating: landfill site, printing and stationary, rental of others, sanitary services, security costs, valuation costs, professional fees and training.

Actuarial gains

The municipality ommited one employee when the employee benefit valuation was performed.

Gains on reversal of provision

The provision for rehabilitation of the langebaan landfill site was not calculated using the latest available closure license. A closure license for this landfill was issued on 2 February 2016 and had less requirements than originally anticipated. The decrease in the provision in excess of the carrying amount of the related asset is recognised immediately in surplus or deficit in line with iGRAP 2 requirements.

Notes to the Annual Financial Statements

48. Utilisation of borrowings reconciliation

Unspent borrowing at beginning of year	28 404 962	4 973 494
New loan	58 180 000	47 060 000
Utilised during the year to finance property, plant and equipment - at cost	(59 226 444)	(23 628 532)
Balance at year end	**27 358 518**	**28 404 962**

Long-term liabilities have been utilised in accordance with the Municipal Finance Management Act. Sufficient cash has been set aside to ensure that long-term liabilities can be repaid on redemption date. Refer to note 51.

49. Change in accounting estimate

During the year under review the municipality assessed the conditions of property, plant and equipment. The estimation of rehabilitation cost for the landfill sites, the remaining useful lives of other assets as well as reviewed residual lives resulted in additional depreciation. The change in accounting estimate led to a net decrease on property, plant and equipment to the amount of R4 816 163 (2016: R924 620). Refer to note 10. The estimation of rehabilitation cost for the landfill sites resulted in the provision being (decreased) increase that resulted in an additional (decrease) increase in the value of assets and provision of Rnil (2016: Rnil).

Furthermore, during the year under review the municipality changed service providers for traffic fines which resulted in a decrease in traffic fines being withdrawn, reduced, written off (struck off) or the offender being given a rebate when settling the traffic fine from 24.45% to 18.64% thus the estimated average success ratio for traffic fines increased from from 75.55% to 81.36%. The average non-payment ratio of traffic fines also increased from 49% to 59%. The increase in success ratio resulted in an increase in traffic fines receivables and revenue amounting to Rnil (2016: R4 508 872) and the increase in non-payment ratio resulted in an increase in the provision for impairment of R3 940 986 (2016: R2 543 004).

Category and reason for change in accounting estimate		
Property, plant and equipment - Remaining useful lives reviewed	(5 211 439)	1 027 657
Property, plant and equipment - Residual values reviewed	-	2 653
Landfill sites - Increase/(decrease) in estimated rehabilitation cost	395 276	(1 954 930)
Net impact on property, plant and equipment	**(4 816 163)**	**(924 620)**

Category and reason for change in accounting estimate		
Traffic fines receivables - Success ratio reviewed	-	4 508 871
Provision for impairment - Non-payment ratio reviewed	(3 940 986)	(2 543 004)
Net impact on traffic fines receivables	**(3 940 986)**	**1 965 867**

50. Change in accounting policy

Disclose expenditure incurred to repair and maintain property, plant and equipment

The municipality changed its accounting policy in respect of the disclosure of expenditure incurred on assets to repair and maintain them. In order to conform with the requirements of paragraph 88 of GRAP 17 and paragraph 88 of GRAP 103 which requires the municipality to separately disclose expenditure incurred to repair and maintain property, plant and equipment and heritage assets in the notes to the annual financial statements.

Disclosure of property, plant and equipment, intangible assets and heritage assets that is taking a significantly longer period of time to complete than expected, including reasons for any delays

The municipality changed its accounting policy to disclose assets taking longer than two years to complete. In order to conform with the requirements of GRAP 16, GRAP 17, GRAP 31 and GRAP 103 which requires the municipality to disclose reasons for any delays in assets taking significantly longer than originally planned for.

Figures in Rand	2017	2016 Restated*

50. Change in accounting policy (continued)

Halting the construction or development of the asset

During the year, the municipality changed its accounting policy to disclose assets where the construction there-off has been halted. In order to conform with the requirements of GRAP 16, GRAP 17, GRAP 31 and GRAP 103 which requires disclosure reasons for halting the construction or development of the asset and indicate whether any impairment losses have been recognised in relation to these assets.

Work-in-progress disclosed in aggregate per class of assets

During the year, the municipality changed its accounting policy to disclose expenditure relating to assets in the process of being constructed or developed aggregated per class of asset in order to conform with the new requirements of GRAP 16, GRAP 17, GRAP 31 and GRAP 103.

These changes do not have an impact on how the underlining transactions are accounted for and presented in the statement of financial performance, statement of financial position and cash flow statements as it only affects the disclosure in the notes.

51. Cash-backed reserves and provisions

Available funds		
Çash and cash equivalents	47 188 229	69 141 698
Investments	505 593 448	433 369 258
Less: Cash-backed reserves and provisions		
Unutilised conditional grants	(29 780 175)	(46 465 441)
Housing development fund	(2 737 829)	(3 207 950)
Unspent loans	(27 358 518)	(28 404 962)
Loan redemption reserve	(8 703 424)	(9 572 268)
Provision for rehabilitation of landfill sites	(87 024 631)	(84 185 302)

Self-insurance reserve	(2 689 585)	(2 689 585)
Consumer deposits	(19 529 675)	(17 293 985)
Capital replacement reserve:		
-Capital replacements	(145 788 014)	(95 745 102)
-Capital contributions	(12 502 399)	(7 068 401)
-Land sale proceeds	(4 776 580)	(3 286 580)
Working capital	**81 993 847**	**79 023 895**

52. Unauthorised, irregular, fruitless and wasteful expenditure

52.1 Unauthorised expenditure

To the best of our knowledge no unauthorised expenditure was incurred during the year under review (2016: Rnil).

Opening balance	-	390 658
Less: Amounts authorised by Council through an adjustment budget	-	(390 658)
	-	**-**

Figures in Rand	2017	2016 Restated*

52.2 Irregular expenditure

Opening balance	62 000	499 035
Payments made not following due SCM process	5 750	65 582
Less: Amounts written off (condoned) by Council		
Competitive tender process not followed	-	(499 035)
Payments made not following due SCM process	(67 750)	(3 582)
	-	**62 000**

Payments made not following due supply chain management processes

During the 2016/17 financial year, two payments were made to the value of R5 750 without following due supply chain processes. A report was submitted to MPAC and Council and unauthorised expenditure to the total value of R67 750 was written off.

52.3 Fruitless and wasteful expenditure

Opening balance	3 752 791	3 765 292
Incorrect salary payments	-	4 420
Interest and penalties accrued on late payments	1 276	-
Cost incurred without receiving any services	46 495	16 337
Advertisement cost - validity period of tender lapsed	-	11 914
Late payments of salaries: Penalties charged to personnel	11 906	-
Less: Amounts recovered		
Incorrect salary payments	-	(2 332)
Cost incurred without receiving the required benefit	-	(4 538)
Less: Amounts written off by Council		
Incorrect salary payments	-	(13 199)
External toilets - Defects repaired	(3 740 877)	-
Interest and penalties accrued on late payments	(1 276)	-
Cost incurred without receiving the required benefit thereof	(70 315)	(25 103)
	-	**3 752 791**

Interest and penalties accrued on late payments
During the 2016/17 financial year, Eskom was paid late, resulting in interest in the amount of R355 to be paid. Vehicle licences were also reniewed late, resulting in a penalty of R921 to be paid.

Cost incurred without receiving the required benefit

During 2016/17 financial year, Council neglected to appear in court to defend a claim initiated against a debtor for arrear amounts. This resulted in a court order against Council to be responsible for the debtor's legal cost and writing-off of the arrear amount. Legal cost amounted to R1 392 and the arrear account amounted to R45 103.

Late payments of salaries

During 2016/17 financial year, salaries were paid late during one month, resulting in additional bank charges of R11 906 for the employees which had to be refunded.

Advertisement cost - validity period of tender lapsed

During the 2016/17 financial year, fruitless and wasteful expenditure incurred during the previous financial year was investigated resulting in additional expenditure identified. This resulted in an increase of advertisment cost from R9 906 to R11 914.

Councillors' arrear consumer accounts for more than 90 days at reporting date

There were no Councillors who had arrear accounts outstanding for more than 90 days as at 30 June 2017.

The Councillors below had their consumer account in arrear for more than 90 days during the reporting period ended;

30 June 2017	Highest outstanding amount	Aging (in days)
Councillor MG Makwetu	11 128	120
Councillor M Schrader	1 777	120
Councillor M Girimane	607	120
	13 512	

30 June 2016	Highest outstanding amount	Aging (in days)
Councillor MS Biko	13 901	120

Figures in Rand	2017	2016 Restated*

54. Deviation from supply chain management regulations

Regulation 12 of the Municipal Supply Chain Regulations 2005 determines that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Regulation 36 of the same regulations also requires that the accounting officer may dispense with the official procurement process in certain circumstances provided that the reasons are recorded and reported to Council.

These circumstances are typically for emergency procurement, procurement where goods or services is available from only one supplier and procurement where it is impractical or impossible to follow the official procedures.

Regulation 36(1)(b) further allows the accounting officer to ratify any minor breaches of the procurement processes which are purely of a technical nature.

Deviations for the year		
Emergencies	2 154 917	2 176 612
Sole provider	4 043 575	7 473 475
Impractical or impossible to follow the SCM process	10 610 926	10 976 330
Ad-hoc repairs	737 305	1 650 889
Strip and quote	9 384 842	6 274 699
Minor breaches of the procurement process	3 527 748	5 029 837
Total deviations for the year	**30 459 313**	**33 581 842**

The details of the deviations for the year under review amounting to R30 459 313 (2016: R33 581 842) are included as Annexure E.

56. Contingent liabilities

Claims against Council

The municipality is currently engaged in litigation which could result in damages or costs being awarded against Council if the claimants are successful in the actions. The following are the estimates.

Barry John Bickerdyke Stephan	500 000	-
West Coast Miracles (Pty) Ltd	-	200 000
Bitline SA 74 CC t/a Westco Atlantic Security Services	-	3 608 995
Municipal Councillors Pension Fund	248 669	222 755
Vredenburg Urban Renewal Project	3 853 171	3 853 171
	4 601 840	**7 884 921**

Barry John Bickerdyke Stephan

An application for the reviewing and setting aside of a Town Planning resolution, of the Portfolio and Appeals Committee of Council for and an application for departure in respect of Farm 116 and Farm Fishing Lease no 117 in the Saldanha Bay Municipality Division Malmesbury. The estimated liability for Council is estimated at R500 000.

West Coast Miracles (Pty) Ltd

An application was handed in for the cancellation of water services on erfs 35 and 40, St Helena Bay by the owner of these properties during the pre. The matter has been posponed, further the attorneys of the applicant has withdrawn and it's unlikely that the matter will proceed in the near future. The estimated liability for Council is estimated at Rnil (2016: R200 000).

Bitline SA 74 CC t/a Westco Atlantic Security Services

A claim for payment relating to rendering of security services has been opened at the Cape Town High Court against Council in the 2015/16 financial year. Council settled during the current year and the cost paid amounted to R400 164.

Municipal Councillors Pension Fund

During the reporting period, the municipality received a letter from the Muncipal Councillors Pension Fund indicating that the employer's contributions for a councillor towards the Fund was not made since June 2011. The municipality is currently disputing the validity of the claim and the estimated liability towards the municipality is 248 669 (2016: R222 755).

Figures in Rand	2017	2016 Restated*

56. Contingent liabilities (continued)

Vredenburg Urban Renewal Project

The municipality obtained a conditional grant from the Department of Transport and Public Works for the acquisition of 7 properties, 32 hectares of land, to be used for the Vredenburg Urban Renewal Project. The conditions of the grant indicated that the municipality shall transfer to the Department the serviced sites, 4,3145 hectares of the purchased properties, for development by the department. An unspent conditional grant liability has been recognised for the cost associated with servicing the sites. The 7 properties acquired had not been re-zoned to determine the 4,3145 hectares portion to be transferred to the department. The historic cost or fair value of this portion could thus not be reliably measured. There is uncertainty about the amount of the obligation the municipality has under this agreement and the timing of the outflow of the economic benefits and/or service potential is also uncertain. The liability for Council relating to the transfer of the 4,3145 hectare portion is estimated at R3 853 171 (2016: R3 853 171).

57. Contingent asset

Lateral Unison - Pending insurance claims	1 657 430	286 223
Marsh - Pending insurance claims	-	10 000
Envitech Solutions (Pty) Ltd	-	104 035
F. Turner and Turner Plant and Harvest CC	-	60 000
	1 657 430	**460 258**

Outstanding insurance claims

The municipality had 25 (2016: 8) outstanding insurance claims with Lateral Unison as at 30 June 2016 of which the payout of, according to the municipality's assessment, is only probable and not virtually certain. The settlement of the claims is estimated to be R1 657 430 (2016: R286 223).

The municipality has no outstanding insurance claim with Marsh South Africa as at 30 June 2016 (2015: 1) of which the payout of, according to the municipality's assessment, is only probable and not virtually certain. The settlement value of the claim is estimated to be Rnil (2016: R10 000).

Litigation claims

Envitech Solutions (Pty) Ltd

The Envitech Solutions (Pty) Ltd case was dismissed with cost by the court during the previous financial year. Envitech Solutions (Pty) Ltd has paid the cost incurred by Council amounting to R100 689 during the current financial financial year.

F. Turner and Turner Plant and Harvest CC

The F. Turner and Turner Plant and Harvest CC case was concluded during the previous financial year. Council won the case and F. Turner and Turner Plant and Harvest CC shall paid cost incurred by Council amounting to R33 000.

Figures in Rand	2017	2016 Restated*

58. Related parties

No members of the municipality's management have significant influence over the financial or operating policies of the municipality. No business transactions took place between the municipality and key management personnel and their close family members, unless specifically disclosed. All members of the municipality's management and their close family members receive and pay for services on the same terms and conditions as other ratepayers and residents. All transactions are at arm's length and no bad debt expenses have been recognised in respect of amounts owed by related parties

58. Related parties (continued)

58.4 Transactions with management

During the 2016/17 financial year the Councillor Francois Schippers leased two properties from the municipality. Councillor Schippers paid rentals of R1 454 including interest (2016: R1 225) for the year. The market related rentals for these two properties are considered to be R10 180 (2016: R9 514).

59. Events after the reporting date

Adjusting events:

To the best of our knowledge there were no events and transactions, both favourable and unfavourable, that occurred between the reporting date and the date when the annual financial statements were authorised for issue.

Non-adjusting events:

The Waste Water Treatment Works was commissioned and will be donated to the municipality by Saldanha Bay Industrial Development Zone as part of the infrastrucutre development programme. The value of the assets to be donated is estimated at R41 687 028. The Board approved the transfer in a meeting held on 23 August 2017 and the Western Cape Provincial Minister of Economic Development and Tourism gave principle approval during a shareholder's meeting on 28 August 2017.

60. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks such as market, credit and liquidity risk.

The municipality's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance.

Figures in Rand	2017	2016 Restated*

60. Risk management (continued)

Credit risk

Credit risk is the risk of financial loss to the municipality if customers or counter parties to the financial instrument fail to meet their contractual obligation, and arises mainly from the municipality's investments, receivables from exchange and non-exchange transactions, non-current receivables and cash and cash equivalents.

Trade and other receivables

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Council. The utilisation of credit limits is regularly monitored.

Investments and cash and cash equivalents

The municipality limits its exposure to credit risk by investing with only the major commercial banks in South Africa that have a sound credit rating and within the specific guidelines set in the council approved cash management and investment policy. Accordingly, the municipality does not consider its exposure to credit risk significant.

Non-current receivables

The non-current receivables have been fully impaired and provided for thus do not expose the municipality to credit risk.

The carrying amount of the financial assets represents the maximum credit exposure and the carrying amount of the financial assets 30 June 2017 was as follow:

Financial instrument		
Trade and other receivables from exchange transactions	81 272 883	91 488 289
Trade and other receivables from non-exchange transactions	29 490 003	32 201 187
Cash and cash equivalents	47 188 229	69 141 699
Investments	505 593 448	433 369 258

Market risk

Foreign exchange risk

The municipality currently procures Microsoft Licences of which the purchase price is denominated in foreign currency (US Dollars) which exposes the municipality to foreign-currency risk. The municipality does not hedge foreign exchange fluctuations. The movement in the currency was not material to the municipality procurement and, consequently, is not elaborated on any further.

The municipality reviews its foreign currency exposure, including commitments on an ongoing basis. The municipality expects its foreign exchange contracts to hedge foreign exchange exposure.

Interest rate risk

The municipality’s interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

Liquidity risk

Figures in Rand	2017	2016 Restated*

60. Risk management (continued)

Liquidity risk is the risk that the municipality might not be able to meet its obligations as they fall due. The municipality has a prudent liquidity risk management strategy which ensure that it maintains sufficient cash and cash equivalents to meet its objective as they fall due. The short-term investments are invested over terms that ensure that the municipality has a short-term maturing every month to reduce the liquidity risk. The municipality also manages liquidity risk through an ongoing review of future commitments and credit facilities.

The average collection rate of receivables (current billing) is 96.8% (2016: 97.2%). Cash flow forecast are prepared and adequate utilised borrowings facilities are monitored.

2017	Up to 1 year	1 to 5 years	More than 5 years	Total
Borrowings - Total repayments	21 694 839	74 078 759	134 071 676	229 845 274

Figures in Rand	2017	2016 Restated*

61. Statement of comparison of budget and actual amounts

Material differences between budget and actual amounts

The reasons for the material variances between the approved budget and the final budget are explained below. A variance is considered material if it is 10% or more.

The adjustments made between the approved budget and the final budget include virements that were made after the approval of the final adjustment budget on 28 February 2017. Virements are transfers from one operating cost element or capital project to another, and are made in accordance with the approved budget implementation and management, funds and reserves and virement policy.

61.1 Statement of financial position:

61.1.1 Cash and cash equivalents

Lower capital expenditure than budgeted resulted in more cash available than budgeted. Cash and cash equivalents are managed to earn optimal interest.

61.1.2 Inventories

Actual stores inventory is higher than anticipated.

61.1.3 Trade and other receivables from non-exchange transactions

The increase in traffic fines for the year under review also resulted in an increase of the provision for debt impairment and impacted on the trade and other receivables from non-exchange transactions which could not have been foreseen during the budget process.

61.1.4 VAT receivable

The actual is less than budget due to the variances in the line items with VAT implications.

61.1.5 Intangible assets

The municipality is busy with an implementation of an mSCOA compliant financial management system. Not all the milestones in respect of implementation were not reached by 30 June 2017 which resulted in underspending..

61.1.6 Investment properties

The budget was based on historic annual fair value movements of investment property however, the anticipated increase did not materialise.

61.1.7 Payables from exchange transactions

Actual payables from exchange transactions are lower than anticipated due to expenditure that was anticipated in June that did not materialise.

61.1.8 Consumer deposits

Consumer deposits increased more than anticipated.

61.1.9 Unspent conditional grants and receipts

The actual unspent grants at year end were more than the anticipated amount due to the fact that certain projects are multiyear projects and will be rolled over to the next financial year. Additional funds were also received late in the financial year.

61. Statement of comparison of budget and actual amounts (continued)

61.1.10 Borrowings

The redemption of new external loans not provided for.

61.1.11 Finance lease obligation

Finance lease obligation was not provided for in the budget.

61.1.12 Employee benefit obligation

Due to actuarial gains of R 6.6 million the obligation did not increase as anticipated.

61.1.13 Deferred rental income

The deferred rental income was not provided for in the budget.

61.1.14 Provisions

The current portion of rehabilitation of landfill site provision was included in non-current provisions with the budget as the rehabilitation was not anticipated to start in the 2016/17 financial year. A tender was however awarded for the rehabilitation of the Langebaan landfill site in February 2017 and the service provider was able to start earlier than anticipated with the rehabilitation. Therefore, the movement from non-current to current provisions.

61.2 Implementation of the capital budget

The municipality has spent R200 678 560 (2016: R145 951 261) of the capital budget of R232 280 911 (2016: R 215 809 476) which translate to a spending ratio of 86% (2016: 68%). The capital expenditure per vote is provided below, as well as the reasons for the lower expenditure.

Vote	Budget	Actual	Variance	% spent
Engeneering and Planning Services	180 387 603	161 557 651	18 829 952	90%
Corporate and Protection Services	29 964 078	22 272 698	7 691 380	74%
Community and Operational Services	14 448 525	11 656 014	2 792 511	81%
Municipal Manager	6 750 000	4 535 577	2 214 423	67%
Finance	730 705	656 619	74 086	90%
Council	-	-	-	0%
Total	**232 280 911**	**200 678 559**	**31 602 352**	**86%**

61.2.1 Engineering and Planning Services

An amount of R 18 829 952 was unspent at 30 June 2017. Included in this amount are various multi- year projects which are completed over more than one financial year. The reasons for the underspending of projects are as follows:

- An amount of R 1 679 552 was unspent on the rehabilitation of existing infrastructure into a new tourism and hospitality facility. The scope of works for this project was changed and will only commence in the 2017/2018 financial year.
- An amount of R 3 410 729 was unspent on the upgrading of Oostewal Street Project in Langebaan. This is a multi-year project of which the scheduled completion date is in the 2017/2018 financial year.
- An amount of R 2 590 066 was unspent on the upgrading of Langebaan Sewerage Works Project. This is a multi-year project which is currently in construction and the scheduled completion date is January 2018.

61. Statement of comparison of budget and actual amounts (continued)

- An amount of R 1 094 904 was unspent on the upgrading of Langebaan Sewerage Phase IV Project. This is a multi-year project which is currently still in the construction phase. The estimated completion date of this phase is 14 September 2017.
- The bulk supply water network has an unspent amount of R 607 847 and is a multi-year project for which work will continue in the 2017/2018 financial year.
- The 10mva Transformer is part of a multi-year project for which work will continue in the 2017/2018 financial year.
- Due to challenges with the contractor and construction of the top structures, the electrical connections could not be completed as planned, therefore funds are rolled over to the 2017/2018 financial year.
- An amount of R 490 865 was unspent on the Saldanha Rugby Stadium. This is a multi-year project of which the completion date is scheduled in July 2017.
- Due to a breakdown of the ringfeeder to Hawe Substation, resources for electrical work had to be prioritised and certain projects will have to be done in the 2017/2018 financial year.
- In various instances, projects are still in construction phase and will only be completed in the 2017/2018 financial year.
- In some instances, savings were realised where the actual project cost were less than the budgeted amount.

61.2.2 Community and Operational Services

An amount of R 2 771 138 was unspent in the 2016/17 financial year. The amount to be rolled over to the next financial year amounts to R 2 584 180. Reasons for underspending are as follows:

- An amount of R 1 949 238 for the erection of a splash park is rolled over as it is still is in the construction phase.
- An amount of R 128 455 for the erection of a boundary wall at the cemetery is rolled over to the next financial year for completion.
- An amount of R 80 500 for the upgrading of Tabakbaai Camp facilities is rolled over to the next financial year due to the delay experienced with service providers and the appointment of a second and third service provider to complete the work and to comply with the Supply Chain Management Regulations.
- The wooden spectator stands in Paternoster could not be procured due to the absence of standard specifications. A service provider needs to be appointed to design and specify the stands, therefore funds are rolled over to the 2017/2018 financial year. In some instances, delays were experienced with the service providers, and work were therefore not completed.
- Savings were also realised where the actual project cost was less than the budgeted amount.

61.2.3 Corporate and Protection Services

An amount of R 7 691 379 was unspent in the 2016/17 financial year. Reasons for underspending are as follows:

- An amount of R 2 569 191 is rolled over to the 2017/2018 financial year in regards to the financial system, as not all milestones for this project has been reached yet.
- An amount of R 1 900 000 for the Security Technology tender is rolled over to the 2017/2018 financial year, as the tender process for this project is not yet finalised.
- An amount of R 1 766 039 for the Animal Pound Facility is rolled over to the 2017/2018 financial year as the project is still in process.
- A land purchase agreement with Transnet is still in progress at year-end and the amount of R 225 000 is therefore rolled over to the 2017/2018 financial year.
- The tender for the procurement of tools and equipment for the fire brigade was cancelled due to the technical nature, and funds was therefore not spent.

Figures in Rand	2017	2016 Restated*

61. Statement of comparison of budget and actual amounts (continued)

- The tender process for the procurement of furniture and equipment for the libraries has not yet been completed and funds are rolled over to the 2017/2018 financial year.
- During the negotiation process, to revert back the fire services from WCDM to SBM, the upgrade of Hopefield Fire Satellite Station was put on hold, to get inputs from the newly appointed Fire hief Officer. Therefore, funds were not spent.
- The funds earmarked for the procurement of furniture for the Saldanha Fire Satellite Station were not spent due to the continuous vandalised activities that occurred.

61.2.4 Municipal Manager

An amount of R 2 214 423 was unspent at year-end. Reasons for underspending are as follows:

- An amount of R 1 000 000 is unspent for the Aerial Photography because no award could be made following the tender process and the project then had to be re-advertised.
- The Wesbank Informal Trading Units' Project amounting to R 500 000 could not proceed, due to communication received from the Provincial Road Engineer.
- An unspent amount of R 277 314 for the Wesbank Landscaping Phase I was unspent due to material not being on site at year-end.

61.2.5 Finance

An amount of R 74 086 was unspent in the 2016/17 financial year. This mainly relates to the procurement of an item of furniture which is not yet completed. Savings was also realised on furniture and equipment items, where the actual amounts was less than the budgeted amounts and where items were not procured.

Figures in Rand	2017	2016 Restated*

61. Statement of comparison of budget and actual amounts (continued)

61.3 Statement of financial performance:

Revenue from exchange transactions

61.3.1 Rental of facilities and equipment

The variance is mainly due to the revenue for camping fees of R 8 795 035 which were budgeted for under other income and not rental of facilities. If the camping fees are included under rental facilities, the variance is only 6%.

61.3.2 Interest earned - outstanding receivables

The amount levied was more than the budgeted amount due to the increase in outstanding debtors.

61.3.3 Interest earned - external investments

Lower actual capital expenditure resulted in additional funds available to invest that realised more interest earned than budgeted.

61.3.4 Agency services

More revenue realised on motor vehicle licencing transactions than anticipated, therefore more commission received than budgeted for.

61.3.5 Gains on disposal of assets

Gains on disposal of PPE occurred during the annual auction of redundant assets. Profit was also realised where Council sold some of its properties.

61. Statement of comparison of budget and actual amounts (continued)

61.3.6 Other income

The negative variance is mainly due to the revenue for camping fees of R 8 795 035 which were budgeted for under other income and not rental of facilities. Certain other items such as building plan fees, land-use planning fees, incidental cash, capital contributions, cleaning of erven and refund of pension fund realised more than budgeted. If the camping fees budget is deducted, a positive variance of 28% is recorded.

Revenue from non-exchange transactions

61.3.7 Other income

An amount of R785 600 was budgeted for under donated assets which has been recognised under grants. If the budget is moved and included under grants, the variance reduces to 18% which is mainnly due to the actual amount for VAT on DORA grants was less than the budgeted amount.

Expenditure

61.3.8 Loss on disposal of assets

Losses are realised when assets are replaced through insurance claims, obsolete assets that were sold per tender as well as certain missing assets, with books values written off for no consideration. An amount of R22 371 463 in respect of impairment of debtors was included under loss on disposal of assets. If the budget is moved and included under debt impairment, the remaining variance is insignificant.

61.3.9 Depreciation, amortisation and impairment losses

Depreciation is budgeted as if capital expenditure will be 100%. Depreciation is lower due to lower capital expenditure and work in progress.

61.3.10 Finance cost

The actual amount for interest on long service awards, interest paid on grants, finance for the rehabilitation of landfill site, interest on operating lease as well as the interest on the external loans slightly more than budgeted. Interest on post-retirement medical aid benefits for employees of R 8 367 996 is however budgeted under employee costs. If this budgeted amount is included under finance costs the variance is only 2%.

61.3.11 Debt impairment

An amount of R22 371 463 in respect of impairment of debtors was included under loss on disposal of assets. If the budget is moved and included under debt impairment, the remaining variance is insignificant.

61.3.12 Contracted services

Less funds were spent on training, consultants and professional fees as well as the contracted service relating to repairs and maintenance of municipal assets when compared to the budget.

61.3.13 Transfers and subsidies

The actual amount spend on transfers and subsidies was less than the budgeted amount. Savings were realised on bursaries for non-employees, squatter control and social assistance.

61.3.14 Inventories written-off

The actual amount for inventories written-off is in respect of one low cost house of R 64 000 and stores inventory to the amount of R 739 949. This could not have been predicted accurately.

61. Statement of comparison of budget and actual amounts (continued)

61.3.15 General Expenses

The actual expenditure on general expenditure is lower than budgeted due to lower levels of activities that anticipated. The municipality also managed to secure some services for less than originally anticipated.

61.3.16 Loss on foreign exchange

Due to Microsoft licences purchase. Loss not budgeted for.

61.3.17 Fair value adjustment

A fair value adjustment was passed on Investment properties that were revalued which was not budgeted for.

61.3.18 Actuarial gains

Actuarial gains amounting to R 6.6 million on post-retirement benefits was accounted for based on the report received from the actuaries.

61.4 Cash flow statement

61.4.1 Taxes and fines

The payments from traffic fines were higher than anticipated due to the higher number of fines issued during the financial year.

31.4.2 Finance costs

The payment for interest costs was lower than anticipated.

61.4.3 Proceeds from sale of property, plant and equipment

The proceeds from sale of property, plant and equipment were not provided for in the budget.

61.4.4 Purchase of intangible assets

The purchase of intangible assets was not provided for in the cash flow budget.

61.4.5 Purchase of other heritage assets

The purchase of heritage assets was not provided for in the cash flow budget.

61.4.6 Net movement from investments

The lower actual capital expenditure resulted in additional funds being available to invest than budgeted.

61.4.7 Repayment of borrowings

The redemption of new external loans not provided for.

61.4.8 Finance lease payments

The finance lease payments were not provided for in the cash flow budget.

Figures in Rand	2017	2016 Restated*

61. Statement of comparison of budget and actual amounts (continued)

61.4.9 Movement in consumer deposits

The National Treasury template for the cashflow budget incorrectly included consumer deposits as a financing activity instead of including it as part of operating activities.

62. Impairment of non-cash generating assets

An entity that prepares and presents annual financial statements under the accrual basis of accounting shall apply GRAP 21 in accounting for the impairment of non-cash generating assets, and GRAP 26 in accounting for the impairment of cash generating assets. Cash generating assets are held with the primary objective of generating a commercial return.

Management has considered both Standards and used the decision tree as per the guide for these Standards, to determine if assets should be treated as cash or non-cash generating.

It was concluded that only GRAP 21 is applicable to the municipality and therefore all assets are accounted for as non-cash generating assets. The amount impaired with respect to these assets is R939 404 (2016: R 2 728 418).

The circumstances that led to the impairment are as follows:

Impairment indicators	Asset class		
Project halted not to be completed	Other	-	1 576 775
Project halted not to be completed	Infrastructure	52 483	-
Infrastructure assets replaced due to obsolescence	Infrastructure	641 556	795 100
Review of the useful lives of landfill sites	Other	-	47 702
Assets damaged irreparable	Other	245 365	308 841
		939 404	**2 728 418**

63. Material losses

Water losses	15 322 451	13 767 382

The losses recorded were 13.91% (2016: 14.39%). These losses are predominantly due to metering inefficiencies, unmetered connections, aging pipeline infrastructure, burst pipes, old reticulation networks and other leakages which are by nature regarded as normal production losses.

Electricity losses	29 294 804	26 172 288

The energy losses recorded were 11.06% (2016: 10.91%). These losses are the result of technical losses caused by the nature of electricity and the manner of its distribution, via the network, status / condition and age of the network, weather conditions and load on the system as well as non technical losses, e.g. theft and vandalism.

Figures in Rand	2017	2016 Restated*

64. Awards to close family members of persons in the service of the state.

The detail listed below is disclosed in terms of Regulation 45 of the Municipal Supply Chain Regulations 2005 that determines that the municipality must disclose particulars of any awards of more than R2 000 to a person who is a spouse, child or parent of a person in service of the state or has been in service of the state in the previous twelve months.

Name of person or entity
